NOTICE OF APPLICATION NO. 7189-3 to Appropriate Water

Notice is given that Cody Christensen, 88005 Hwy 57, Hartington NE 68739 has filed an application for a water permit to appropriate 0.78 cubic feet of water per second (cfs) from one well to be completed into the Missouri:Elk Point Aquifer (approximately 100 feet deep) located in SW 1/4 SW 1/4 Section 35 to irrigate 40 acres located in the SW 1/4 SW 1/4 Section 35; all in T93N-R54W. The applicant is requesting a diversion rate greater than the statutory limit of 1 cfs per 70 acres.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 7189-3 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the Chief Engineer will act on this application, as recommended, unless a petition is filed opposing the application or the applicant files a petition contesting the Chief Engineer's recommendation. If a petition opposing the application or contesting the recommendation is filed, then a hearing will be scheduled and the Water Management Board will consider this application. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting this application or recommendation must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendation. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by May 3, 2010.

The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to this application. Steven M. Pirner, Secretary, Department of Environment and Natural Resources.

Published twice at the total approximate cost of $51.54.

Estimated publishing cost per published copy: $0.0030

Invitation to Bid

Yankton Sioux Tribe
Division of Transportation
Planning
CLOSING DATE:
April 30th, 2010

Sealed bid proposals will be received by the Yankton Sioux Tribe (YST), Division of Transportation until 10:00A.M. CDT April 30th, 2010 at the office of:

Transportation Planning
PO Box 248
Marty, SD 57361
Attention: Wesley Hare Jr.

And then at said office publicly opened and read aloud.

The proposed work includes Rural and Urban Grading, Drainage, Base Course, Sidewalk, Curb & Gutter, Asphalt Concrete Surfacing and all associated work on BIA Route 2000 (Lawrence Township 299th Street and Veterans Drive).

The sealed proposal shall be clearly marked on the exterior of the envelope "Lawrence Township 299th Street and Veterans Drive Reconstruction" April 30th, 2010. Copies of the plans, proposal and specifications may be obtained by calling the office of:

Brosz Engineering, Inc.
3030 Airport Road
Pierre, SD 57501
Office Phone 605-224-1123

Upon receipt of a non-refundable payment of $50.00, made payable to Brosz Engineering, Inc.

Bids must be accompanied by a **bidders bond** made payable to the Yankton Sioux Tribe in the sum of not less than **twenty percent (20%)** of the total base bid; executed as principal and by a surety company authorized to do business in the State of South Dakota as a guaranty that the Bidder will enter into the contract, if it is awarded to him, and that he will furnish the necessary performance and payment bonds. The low Bidder will also be required to provide insurance certification.

The Yankton Division of Transportation reserves the right to reject any or all bids, to waive irregularities and informalities therein. Indian preference will be given per Yankton Sioux Tribe TERO. For TERO information contact Leonard Heth at 487-7192. A TERO fee of 2% on the total contract is required. A business license is also required. Information may be obtained by calling Kathy Winkler at 605-384-3641.

Notice to proceed will be issued by YST after approval of the Contract by the BIA.

/s/ Wesley Hare Jr.

1913 Abraham Lincoln Film Found In N.H. Barn Cleanup

CONCORD, N.H. (AP) — In a tale celebrating the romance of movies, a contractor cleaning out an old New Hampshire barn destined for demolition found seven reels of nitrate film inside, including the only known copy of a 1913 silent film about Abraham Lincoln.

"When Lincoln Paid," a 30-minute film about the mother of a dead Union soldier asking Lincoln to pardon a Confederate soldier whom she had initially turned in, stars the brother of John Ford, director of "The Grapes of Wrath," "The Quiet Man," and other classics.

"I was up in the attic space, and shoved away over in a corner was the film and a silent movie projector, as well," Peter Massie, a movie buff, said of his discovery in the western New Hampshire town of Nelson. "I thought it was really cool."

It was the summer of 2006, and the film canisters sat in his basement for a while before Massie thought of contacting nearby Keene State College, where film professor Larry Benaquist thought it was a rare find.

After working with the George Eastman House film preservation museum in Rochester, N.Y., the college determined that the film, directed by and starring Francis Ford, did not exist in film archives. In fact, it was one of eight silent films starring Ford as Lincoln; there are no known surviving copies of the others.

"The vast majority of silent films, particularly from the early period — the first decade of the 20th century — are gone," said Caroline Frick Page, curator of motion pictures at George Eastman House. "That's what makes these stories so incredibly special."

The college, which plans an April 20 film screening, received a grant from the National Film Preservation Foundation to restore it. It took a Colorado lab a year to complete the task.

Benaquist said the images themselves were well preserved, likely because they endured decades of New England winters in the barn, which also was well sheltered by trees. Nitrate film, which was phased out in Hollywood in the 1950s, is highly flammable. The 35 mm film itself had shrunk and the sprocket holes used on projectors were shredded.

"What the laboratory had to do was remanufacture the sprocket holes to a new dimension, make it in strips, adhere it to the image, and then run it through a printing process where they would print it, frame by frame," Benaquist said.

Benaquist thinks the film was discovered in Nelson because the town is on Granite Lake, the site of many summer camps through the years. He said there was a boys' camp in the area of the barn and believes the films were shown to entertain the children, then put away and forgotten.

Helping the restoration was Mark Reinhart of Columbus, Ohio, author of "Abraham Lincoln on Screen." He had a crude video copy of the film that had been made from an 8-mm copy and included a few scenes that were missing from the film found in the barn. The college combined a DVD of the restored film with a DVD taken of Reinhart's film for its final version.

Back in 1913, the film was praised by "Moving Picture World," a weekly trade publication sent to film distributors, as "a great war drama" with vivid battle scenes.

Francis Ford, who died in 1953 at age 72, is better known for small, mostly comic roles in at least 30 of his younger brother's films, "often playing a coonskin drunk who can spit across the room," said Tag Gallagher, author of the book "John Ford."

The Fords were from Portland, Maine. Francis Ford, who introduced John Ford to the business, was quite famous as a director and star, acting in numerous silent films up until World War I, Gallagher said. When John Ford started directing, his fame overshadowed his brother's.

Old movie buffs might remember Francis Ford in such scenes as a drunken juror in 1939's "Young Mr. Lincoln" starring Henry Fonda, and an elderly man who miraculously rises from his deathbed to see a climactic fistfight in 1952's "The Quiet Man" starring John Wayne.

Authorities: 4 Believed Dead In Navy Plane Crash

MORGANTON, Ga. (AP) — All four crew members aboard a Navy plane that crashed in north Georgia woods are believed dead and searchers scoured the site Tuesday afternoon for the fourth victim after finding three bodies earlier, authorities said.

Naval Air Station Pensacola spokesman Harry White told The Associated Press that all four were presumed killed in Monday afternoon's crash of the Florida-based T-39N Sabreliner. He said authorities reached that conclusion as a team of at least seven military personnel arrived Tuesday afternoon in the dense forest.

A six-person civilian crew contracted by the military also was on hand and law enforcement officers left the wreckage undisturbed overnight for the arriving investigators, Fannin County Sheriff's Office Maj. Keith Bosen said.

The plane just missed a house when it crash Monday afternoon, and authorities said no one on the ground was injured.

"The way the aircraft impacted, it was not believed that there were any survivors," Bosen said Tuesday.

The plane was part of Training Air Wing 6, which conducts routine cross-country missions through Fannin County, where it crashed, White said. The area is north of Atlanta not far from Georgia's boundaries with North Carolina and Tennessee.

Searchers found three bodies earlier and Bosen said there was no evidence that a parachute had deployed.

The twin-jet plane can carry two pilots and seven passengers, according to a Navy Web site.

RIVER

From Page 1

for navigation on March 15. We had enough water in the system at that time to start the season at full service," Swenson said.

Another check will take place July 1.

"All of the scenarios show that we'll have a full season," Swenson said.

One of the only problem areas in this regard is Fort Peck, where only nine of 11 boat ramps are usable.

"The issue for these basically is access to water — not that there's not enough water, but in some cases it's a little harder to get access," Swenson said.

For this reason, the Corps is minimizing releases in the Fort Peck area.

"However, we do want to provide enough water for irrigators, so we're basically minimizing releases most of the year, and then during the irrigation season we're coming up a little bit," Swenson said.

Two endangered species of birds — the piping plover and the interior least tern — were also discussed.

The Corps has tried to ensure the future of these birds through a system it calls steady release — flow to target.

"At the beginning of the nesting season, we pick a release from Gavins Point that we think will get most of the way through the navigation season, and also minimize their take of least terns and piping plover," Swenson said.

As the season progresses, releases are increased if the areas downstream dry up.

This could mean a problem for the birds, which nest on sandbars.

"Now that we're starting to recover the pool levels, we're also losing the habitat that the birds were using around the reservoirs," Swenson said.

The 2010 Annual Operating Plan for the Missouri River Mainstem Reservoir System is available on the "Reports and Publications" section of the Water Management Web site, http://www.nwd-mr.usace.army.mil/rcc, and is available in hard copy by writing to: Missouri River Basin Water Management Division, U.S. Army Corps of Engineers, 1616 Capitol Ave, Suite 365, Omaha, NE 68102-4909.

ABORTION

From Page 1

the few doctors in the nation who performs them in Nebraska.

Set to take effect in October, it is based on the claim that fetuses can feel pain at 20 weeks. The current standard in abortion restrictions is viability, or when a fetus is able to survive outside the womb — generally at 22 to 24 weeks.

The law could lead to changes in state laws across the country if upheld by the courts, said Mary Spaulding Balch, legislative director for National Right to Life.

"It would broaden the interests of states in protecting the unborn child," she said. "It says the state has an interest in the unborn child before viability."

Heineman also signed the other bill, approved by lawmakers on Monday, that requires the screening for mental health problems and other risk factors indicating if women might have problems after having abortions.

The fetal-pain bill is partially meant to shut down Dr. LeRoy Carhart, who attracted attention after his friend and fellow late-term abortion provider Dr. George Tiller was shot to death by an abortion foe in Kansas last year.

Kansas, worried that he might move there, has passed a bill awaiting action from Gov. Mark Parkinson, an abortion-rights Democrat. It would require doctors to list an exact medical diagnosis justifying a late-term abortion and also adjust the definition of viability so a fetus would be considered viable if there's a "reasonable probability" it would survive outside the womb with life-sustaining measures such as an incubator.

Also, it codifies a state rule that the required second opinion on whether late-term abortions are necessary come from doctors in Kansas.

Attempts to restrict abortion across the country aren't unusual — in Oklahoma, for example, new laws on abortions have been approved this year including a ban on abortions based on the gender of the child and tighter restrictions on the use of the RU-486 abortion pill.

South Dakota voters in 2006 and 2008 turned down proposals to ban abortion outright.

Nebraska's law barring abortions after 20 weeks is sure to be challenged in court. Carhart has suggested he might do so. In January, he told The Associated Press, "they can pass any law they want to ... and spend millions of dollars to go to court and lose."

A spokesman for Carhart said this week that he has no plans to leave Nebraska, but is exploring his options and isn't ruling out a move to Kansas.

The switch from viability to fetal pain in justifying abortion limits raises fresh legal issues.

Abortion opponents say a 2007 U.S. Supreme Court ruling upholding a federal ban on certain late-term abortions opens the door for such legislation because it suggests states have an interest in protecting fetuses. They also say new studies and testimony from doctors prove fetuses feel pain at 20 weeks.

The argument used to justify the 20-week ban is based on the testimony of some doctors, some of it given during a 2005 congressional hearing. They contend there is substantial evidence that by 20 weeks, fetuses seek to evade stimuli in a way that indicates they are experiencing pain.

"The Nebraska Legislature has taken a bold step which should ratchet up the abortion debate across the nation," Nebraska Right to Life director Julie Schmit-Albin said. "What we didn't know in 1973 in Roe versus Wade ... we know now."

The American College of Obstetricians and Gynecologists, however, says it knows of no legitimate evidence that fetuses experience pain at that stage.

"There is certainly no solid scientific evidence establishing that a fetus can perceive pain at these earlier stages, so any court decisions to uphold such broader laws could only do so by disregarding the importance of good scientific evidence," said Caitlin Borgmann, a law professor at The City University of New York.

The U.S. Supreme Court would have to overturn earlier abortion-related rulings to uphold the Nebraska law, Borgmann said, including a 1992 ruling in Planned Parenthood v. Casey that upheld the right of women to have abortions before fetuses were viable.
