Free Training For Owners, Operators Of Regulated Underground Storage Tanks Offered In S. Dakota

PIERRE — The Department of Environment and Natural Resources (DENR) has partnered with the South Dakota Petroleum and Propane Marketers Association to offer a second round of free training to help owners and operators of regulated underground storage tank systems comply with state and federal requirements.

The Energy Policy Act, which was passed by Congress in 2005, contains requirements for training owners and operators of regulated underground storage tanks.

Owners and operators will be trained to properly operate tank systems to prevent spills and releases to the environment, to minimize accidental releases through early detection, and to mitigate damage from a release

with proper emergency response.

“DENR is happy to work with the Petroleum Marketers Association to offer a second round of storage tank training,” said DENR Secretary Steve Pirner. “Besides complying with the federal training requirements, this training will reduce the risk for storage tank owners and operators of having environmental problems in the future.”

Free training was provided to 810 owners and operators during 33 training sessions in 2011. As a result, records show that 61 percent of the permitted storage tank facilities in the state are in compliance with the training requirements. The federal deadline for all owners and operators to attend a training session is Aug. 8, 2012.

To assist owners and operators in complying with these requirements, DENR is using the state Petroleum Release Compensation Fund to pay for the training through a contract with the Petroleum and Propane Marketers Association. Owners and operators must attend one of the 4-hour training sessions that will be held on specified dates during April 24 to Aug. 3. Training will be conducted in Rapid City, Fort Pierre, Sioux Falls, Yankton, Aberdeen and Watertown.

Registration can be done online at <http://denr.sd.gov/tanks> or by calling Dawna Leitzke of the Petroleum and Propane Marketers Association at (605) 224-8606. For more information about the training, call DENR at (605) 773-3296.

Pipeline

From Page 1

would let the state restart its review, after President Barack Obama denied a federal permit in the face of a congressional deadline, halting the process. Obama said Congress’ deadline didn’t give federal officials adequate time to review the pipeline.

Initially, plans to route the \$7 billion, 1,700-mile pipeline through Nebraska’s Sandhills region prompted the most intense complaints from a coalition of environmentalists and rural landowners. They argued a pipeline would endanger the Sandhills’ fragile, grass-covered dunes and the vast Ogallala aquifer that lies beneath them.

“It’s just that, because of how things have unfolded in Nebraska, presenting a corridor is a bit of a gut check for us,” Howard said. “We want to make sure that the next steps we take — in terms of narrowing it down to a route — that we know we’re respecting the mandate given by both the Legislature and the governor.”

Pipeline opponents say TransCanada is trying to secure landowner support before the corridor is unveiled.

Last week, a TransCanada spokesman touted the project at a local Rotary gathering in Columbus. The anti-pipeline group Bold Nebraska said it’s also keeping watch on Antelope County, in northeast Nebraska, amid reports that company officials have visited residents.

Due to concerns about the initial route, Gov. Dave Heineman called a special session to discuss options for giving the state more control over such pipeline projects. TransCanada agreed to choose another route that avoided the Sandhills, and Howard said company officials planned to meet with the Nebraska Department of Environmental Quality to show state officials its proposal on Jan. 19.

However, Obama rejected the federal permit application on Jan. 18, blaming the congressional deadline.

The bill in the Legislature would allow the state to restart an environmental review of the Keystone XL despite objections raised by pipeline opponents that the state could expose itself to a legal challenge. Speaker of the Legislature Mike Flood said lawmakers will likely make changes to shield the state from accusations that the

bill is unconstitutional “special legislation” that could only be applied to TransCanada rather than pipelines in general.

The bill would require a Department of Environmental Quality review of any proposed route, as well as approval by the governor, before TransCanada could use eminent domain to claim land for the project. It also would require multiple public hearings along the proposed route.

Jane Kleeb, executive director of the Bold Nebraska, said her group is concerned about a review overseen by the Department of Environmental Quality because the agency is part of Heineman’s administration. The Republican governor has said he supports the project.

Kleeb said the state Public Service Commission should conduct the review. One bill passed during the special session authorizes the five-member commission to examine future pipeline projects, but it did not apply to the Keystone XL. Commission members are elected by district to oversee telecommunications, mass transit and utilities.

“We just think it will be a more transparent, citizen-accessible process,” Kleeb said.

Department of Environmental Quality spokesman Jim Bunstock said the state agency hasn’t seen TransCanada’s corridor proposal. Bunstock said the state had spent \$152,300 on its study so far, which includes a contract with Omaha-based HDR Engineering to examine possible new routes.

“We don’t know if we’re in the picture until we’re given authority by the Legislature and the governor,” Bunstock said.

TransCanada agreed to submit to the Nebraska environmental review in November, in the midst of the special session.

The pipeline would stretch from Alberta in Canada to Texas refineries along the Gulf of Mexico. If completed, it will carry oil from Canada across Montana, South Dakota, Nebraska, Kansas, Oklahoma and Texas. TransCanada also had proposed connecting it to the Bakken oil field in Montana and North Dakota.

The southern leg of the pipeline from Oklahoma to the Gulf Coast may be built regardless of what happens with the section between Canada and Oklahoma. During a tour in March focused on energy, Obama announced he would push to develop the southern leg of the Keystone XL pipeline that would connect an existing TransCanada pipeline to Texas refineries.

75 YEARS AGO
Friday, April 2, 1937
• Yankton College students were wondering today if they were not involuntarily taking part in some kind of stand-up or sit-down strike at the Kingsbury Dining Hall, but they were sure of one thing, they were hungry! The case of the missing Kingsbury dining hall chairs loomed up this morning to baffle both students and faculty of Yankton College as they made ready to leave the campus on the annual spring recess, which begins at the close of classes this afternoon. With the chairs gone, no breakfast was served to the hungry students who unsuspectingly left their comfortable beds for the morning meal. It was announced no lunch would be served until the chairs were found. Campus workers carried out a systemic search all over the campus this morning and at 11:50 on a tip from secret sources the search led to the space below the stadium and the chairs were found. It is believed the removal of the chairs was a belated April Fool’s Day prank by certain students of the college, but the identity of the pranksters today was only a matter for speculation, although the very nature of the crime suggests that there must have been a number of people in on the job.
• Five South Dakotans won prizes of \$5 each in the peace garden contest sponsored by H.E. Beebe of Ipswich, the state poetry society announced today. The winning poems will be published in the May issue of

Pasque Petals, the magazine of the South Dakota State Poetry Society. Winners were Beulah Windle Scallin, Mitchell; Will Chamberlain, Yankton; Jessie M. Gilmore, Belle Fourche; Hildegard Fried Dreps, Vermillion; and Leona J. Johnson, Faith.

50 YEARS AGO
Monday, April 2, 1962
• The Cimpr Packing Company employees will gather at the Cimpr plant together with their families and all proceed together in a caravan of approximately 40 cars to the Yankton business district Tuesday evening for the industrial appreciation night. Yankton retail stores will be open 7-10 p.m. Tuesday to serve employees of Yankton industrial firms and their families. The Gurney Seed and Nursery paid its employees their weekly pay Friday in silver dollars with some 1,200 pounds of silver dollars being used for the purpose. Some retail merchants Saturday had to provide special bags for silver dollars because they didn’t have room enough for them in their cash registers. The Dale Electronics payroll for last week was in the form of \$2 bills and Cimpr Packing Company will be making a payment in advance of part of the regular bi-monthly payroll on Tuesday in the form of \$2 bills.
• One wrecked span of the new Interstate 29 bridge in Sioux City lay under water Monday as the Big Sioux River, which knocked it off its moorings sent a flood crest rolling by

Sioux City. The north section of the \$350,000 dual highway bridge collapsed early Sunday when its base supports yielded to the pounding of the raging river.

25 YEARS AGO
Thursday, April 2, 1987
• Portec-Kolberg’s multi-million dollar expansion became official Wednesday when Gov. George Mickelson and company officials cut the ceremonial ribbon that wrapped up 120 new jobs for this area.
• Federal subsidies for thousands of farmers who have retooled their finances to get around payment limits could top \$1 billion by 1989 if the current trend holds, a government projection shows.

current facility to include a large modern kitchen, redoing Sunday School rooms and office spaces, as well as remodeling the current worship space into a meeting/gathering area for a family space so the church has a place for indoor gatherings.

“All together, the project will be about \$4 million once it is finished in all its stages,” Wildermuth said. “My hope is that a year from now at Easter, we can worship in our new space. Following that, step by step, we will finish the rest. I know that will mean at least one more capital campaign and continuing what we are doing. There is a lot of hard work left.”

Joining the congregation Sunday was South Dakota ELCA

Bishop David Zellmer, who said he felt it was important to be a part of the celebration.

“This is one of our outstanding churches in the South Dakota Synod and we have always had a great relationship with them,” he said. “I have many friends that are members down here, so it is personal for me as well. It is because of the gifts from other places as well as here that this is going to be able to take place. We are excited about what is going on.”

Zellmer said he believes the new facility is needed and will be very useful both for fellowship and for worship.

While there is a lot of excitement about the new addition to the church, Wildermuth admitted it is bittersweet leaving behind the comforts of their current worship space.

“I think it is always bittersweet when taking on a project like this because you are leaving

behind something that has been so significant to your congregation,” he said. “But, at the same time, we are going to preserve that. Everyone has a high anticipation of that which is coming and enhancing our ministry opportunities here at Trinity.”

In the end, Wildermuth directed the attention back to the youth of the church.

“This is all about the kids,” he said, while looking at the excitement on the faces surrounding him. “You look down the road, they are the reason we are doing something like this. It is an exciting time for them.”
