New Book: Springsteen's 'Born To Run' Almost Died

BY JOHN J. MOSER

© 2013, Morning Call (Allentown, Pa.)

ALLENTOWN, Pa. — On a July evening in 1975, a rising musician who had critics fawning but hadn't yet captured the fancy of the general public was at a Kutztown, Pa., hotel during a two-night stand at the state college.

His manager appeared at the hotel room door, carrying a fresh test copy of the just-completed album the singer had labored over for an agonizing year and a half. The artist gathered his band and dropped the acetate disc on a portable record player he carried with him on the road to hear the fruits of his labor, believing it would be the breakthrough his career needed.

The singer was so dissatisfied with what he heard that he snatched the disc from the turntable, stalked out to the hotel courtyard and flung it into the swimming pool. He then piled his management team into a car for a drive back to New York to scrap the project.

Bruce Springsteen's "Born to Run" almost died in Kutztown. That's the vivid story told in

That's the vivid story told in "Bruce," a new authorized biography of Springsteen, who went on to become one of the top-selling, most honored and most influential artists of all time, with 23 gold or platinum discs, 20 Grammy Awards, 120 million albums sold worldwide and legions of fanatical fans.

"Born to Run" was perhaps the most important record in Spring-steen's career, containing his career-defining title track. It sold 6 million copies and, 38 years later, remains his biggest-selling studio disc besides 1984's "Born in the

Author Peter Ames Carlin, who also has written biographies of Paul McCartney and the Beach Boys' Brian Wilson, wrote "Bruce" with Springsteen's cooperation. Carlin sat for interviews with the singer, his family, his management and his band members. His book includes what likely is the last major interview with Springsteen saxophonist Clarence Clemons, who died in 2011.

The story of the Kutztown incident involving "Born to Run" is key to illustrating Springsteen's life and career, Carlin said in an email interview.

"You're always looking for the big themes in an artist's life, but those usually emerge through the quotidian details of ordinary life," he said.

Springsteen's then-manager, Mike Appel, who in a telephone interview largely confirmed the book's account, put it this way:

"It was just one of those moments," Appel said. "His fear of letting go got the best of him. It was the background for the greatest album of all time. It was a momentous moment, and it happened right

The story of how music industry people and critics fell in love with Springsteen far before the general public is well known.

Springsteen's first two albums, while critically acclaimed, sold modestly, with neither breaking into the Top 50 on the albums charts nor producing any singles that even charted.

Carlin's book says Springsteen was worried about his future and believed his third album, "Born to Run," needed to be the one that would break through.

The sessions for the album started in January 1974, and by that summer, Carlin writes, only the title track was finished. Columbia Records President Bruce Lundvill told Springsteen and Appel they had a hit record.

"You might think that sweeping praise from the top executive in his record company would have eased the make-or-break burden that Bruce lugged with him," Carlin writes. "You would be wrong. Because whenever he listened to the first two albums, all Bruce could hear were the things he wished he'd done differently."

The book says recording sessions stalled as Springsteen obsessed over details of the songs, "laboring over every syllable in his notebook," and recording sessions "became an endless series of false starts." Springsteen even changed studios, but "the process felt slow, grim and tortuous," the book says.

After the recording was finished, the process of mixing the tracks—blending together and enhancing the performances into the final recordings—bogged down just as quickly, Carlin writes. He writes that it dragged on until the dawn of July 20, 1975—just hours before Springsteen was to kick off the tour to promote the album in Providence, R.I.
