# **Cosmic Adventure For Kids**

"Explore the Cosmos like Neil de-Grasse Tyson" by CAP Saucier; © 2015, Prometheus Books; 177 pages

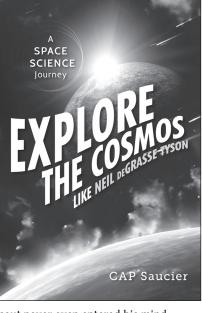

### BY TERRI SCHLICHENMEYER

Nighttime is absolutely your favorite

Some people choose to hang out with friends after dark. Some go to movies, listen to music or just go to sleep. But you — as soon as it's dark, you lay down somewhere quiet and look up. That's where the stars are, and in the new book by CAP Saucier, you can learn to "Explore the Cosmos like Neil deGrasse Tyson."

Born a few days before the National Aeronautics and Space Administration began, Neil deGrasse Tyson likes to say he's the same age as NASA. By the time he was nine years old, he was "in love with the night sky" and at eleven, he knew he wanted to be an astrophysicist (a scientist that studies the universe). He was so fascinated by planets and stars that he almost got in trouble with a telescope when he was a teenager.

Tyson's parents both stressed to him that skipping college was not an option and so, though he wasn't a great student in high school, Tyson went to Harvard, then to the U of Texas and to Columbia University. Why, you might ask, didn't he become an astronaut? Back then, the program wasn't open to African Americans, so being an astro-

naut never even entered his mind. In finding beauty in the night sky, Tyson is not alone.

More than 2,500 years ago, the Greeks looked upward and tried to understand what they saw. Other cultures studied the heavens, too; Ptolemy tried to count the stars, and stopped at a thousand. In recent years, we've learned more about the cosmos than ever before, but there's still so much we

To study the stars, you need to un-

derstand light and physics. You'll need to know about galaxies and Nebulas, which look different and have descriptive names. You'll want to find out the truth about black holes, and why you

never, ever want to be "spaghettified." And above all, says Tyson, stay in school, learn math, and go for the best education you can get. Even if you don't end up studying stars, that's always a good path to take.

I was pleasantly surprised and a little daunted, both, by "Explore the Cosmos like Neil deGrasse Tyson."

The delight comes in the biography part of this book. Author CAP Saucier lets us explore the life of Neil deGrasse Tyson, from his childhood to his fascinating career today and what he thinks about the future of space exploration. Along the way, we're given an education on the universe and what's in it.

That part, however, can be formidable; the language is more advanced than I would have liked to see in a book for middle-graders. Kids who tackle those sections will need a better-thanaverage understanding of astroscience, since those pages aren't otherwise very kid-friendly.

I think maybe a science-loving 9-year-old could try this book but it's really better-suited for someone older. For a sharp child with her head in the stars, "Explore the Cosmos like Neil deGrasse Tyson" is pretty cosmic.

This program is funded by the South Dakota Humanities Council, an affiliate of the National Endowment for the Humanities. The library owns the book Dear Unforgettable Brother which the theatre is based upon and the DVD entitled The Stavig Letters which also tells this story.

The Readers Anonymous book club will discuss "Room" by Emma Donoghue on May 12. This club, which is always open to new members, meets the second Tuesday of each month, at 1 p.m., at the library.

Between the Lines book club will discuss Carla Buckley's "Invisible" on Tuesday, May 26, 5:30. This book club, which meets on the fourth Tuesday of each month, at 5:30 p.m., is open to new members as well.

Be sure to check out our gardening and landscaping display. We are even pulling an old card catalog out of mothballs! We have books and DVDs that will help you plan new or renovate current green spaces. Look for these new items on our shelves: "The Backvard Homestead Book of Building Projects" by Spike Carlsen, "Cultivating Garden Style: Inspired Ideas and Practical Advice to Unleash Your Garden Personality" by Rochelle Greayer, "Drink the Harvest" by Nan Chase, "The Greenhouse Gardener's Manual" by Roger Marshall, "Improving Your Soil: A Practical Guide to Soil
