- Must have registrant's cleaning instructions and repackaging authorization on hand.
- EPA Establishment number and net contents must be on the product label affixed to the tank.
- Container integrity is the responsibility of both the re-filler and registrant.
- Records must be kept for each inspection and fill that includes the pesticide, amount, EPA establishment number and tank serial number or code.
- All DOT tanks must be pressure tested every 2 1/2 years according to DOT re-testing procedures. There is a month/year date stamped near the UN Marking that indicates the original certification date.
