IN THE JUVENILE COURT FOR SIOUX COUNTY, IOWA

IN THE INTEREST OF:

WILLIAM HENRY HANEKLAUS JR.

DOB: 10/12/2010

A CHILD.

NO. JVJ0002726
ORIGINAL NOTICE

TO: William Henry Haneklaus
1412 Wood St.
Springfield SD 57062-2238

You are hereby notified that there is now on file in the office of the clerk of the above Court a petition in the above-entitled action, a copy of which is attached hereto, which prays for a termination of your parent-child relationship with the above-named child pursuant to Division IV of Iowa Code Chapter 232. The Petitioner is the State of Iowa whose attorney is Coleman J. McAllister, Sioux County Attorney, and whose address is 210 Central Avenue SW, PO Box 168, Orange City, Iowa, 51041, phone # (712) 737-2457

You are further notified that a hearing to determine whether your parental rights should be terminated to the child in interest pursuant to Iowa Code Section 232.117 shall be held before the Juvenile Court on the **31st day of August, 2012 at 1:00 p.m.** in the Courtroom of the Sioux County Courthouse in Orange City, Iowa. If you fail to appear and defend at said time and place, judgment by default may be rendered against you for the relief demanded in the petition.

/s/

Deb Fischer
Clerk of the Above Court
Sioux County Courthouse
Orange City IA 51041

If you require the assistance of auxiliary aids or services to participate in court because of a disability, immediately call your district ADA coordinator at (712) 279-6616. (If you are hearing impaired, call relay Iowa TTY at 1-800-735-2942.)

ADVERTISEMENT FOR RFP

Proposals from interested consultants that want to provide services for concept development, feasibility study, management options, operation options, and maintenance options of a new multi-purpose sports complex are being accepted by the City of Yankton. Please provide one (1) original, ten (10) hard copies, and one (1) digital (PDF) copy of the proposal to:

City of Yankton
Attn: Al Viereck
Sports Complex Consulting Proposal
416 Walnut St.
P.O. Box 176
Yankton, SD 57078

The deadline for submitting proposals is 5:00 P.M. on Monday, August 27, 2012.

2010

Legal and Public Notices

Disposition of said proposals is expected to be held on the 24th day of September, 2012 at 7:00 P.M., during the City Commission meeting.

2010

Legal and Public Notices

Proposals will be based on the complete Request for Proposals document as prepared by the City of Yankton Parks & Recreation Department. Please contract Todd R. Larson, Director of Parks & Recreation, Ph: 605-668-5231, email: tlarson@cityofyankton.org, to receive the complete RFP.

2010

Legal and Public Notices

The CITY is interested in receiving qualifications and proposals from Firms experienced in the development of multi-purpose sports complexes and related facilities. The CITY intends to award a contract to the best qualified Firm that offers a proposal that is deemed to be in the CITY'S best interest. The CITY requests proposals from organizations that can act as a strategic partner being able to derive clear objectives that are beneficial to the user groups and residents of the City of Yankton. The successful Firm must be able to balance infrastructure, environmental, social, economic, and political issues so that City officials are able to decipher, deliberate, and deliver the best possible sports complex proposal to its residents. The successful RFP will be awarded upon professional experience, references, details, format, presentation, imagination, and costs.

Proposal envelopes shall be clearly marked on the outside lower left corner "YANKTON SPORTS COMPLEX PROPOSAL". Full responsibility for the delivery of mailed proposals prior to the deadline for receiving proposals rests with the bidder.

The City of Yankton reserves the right to reject any and all proposals. The City of Yankton also reserves the right to accept the proposal that meets the specifications/requirements and is most advantageous to the City. No proposals may be withdrawn until 30 days after the submission deadline.

Todd R. Larson
Director of Parks and Recreation
City of Yankton, SD

Staying Current On Child Support Payments Helps Children, Avoids Future Financial Burdens

LINCOLN, Neb. — In recognition of Child Support Awareness Month in August, Thomas Pristow, director of Children and Family Services at the Nebraska Department of Health and Human Services, said parents who pay child support help build their children's sense of security, confidence and trust resulting in better outcomes in school, health and parental relationships.

Nearly 70 percent of child support in the state is paid, according to federal measures, he said, which consistently rank child support payments in Nebraska in the top 10 nationally.

"During Child Support Awareness Month, we thank parents who meet both their parental responsibility and financial obligation to support their children," Pristow said. "We encourage parents who are behind on child support payments to contact DHHS' Child Support Enforcement to find ways to become current on payments, which not only helps their children but it also lowers costs for taxpayers."

He said unpaid child support follows parents their entire life, and enforcement can involve the withholding of income, even

including possible garnishment of a parent's Social Security checks following retirement. The growth of interest also is added to unpaid child support, and driver's licenses may be suspended or passports revoked. In addition, professional or recreational licenses could be suspended, or garnishment of tax returns and bank accounts can occur.

"Child Support Enforcement stands ready to work with parents to develop a plan to consistently pay their child support," Pristow said. "We are here to treat both parents fairly, and we have a dedicated staff that is committed to ensure all children receive an equal opportunity for success in life."

Parents may contact CSE toll-free at 1-877-631-9973 or 402-441-8715, he said.

"The most important part of child support is that children are impacted as little as possible when each parent takes their responsibilities seriously," he said.

More information is available at the Child Support Enforcement Website: http://dhhs.ne.gov/children_family_services/Pages/cse_index.aspx.

Lake

From Page 1A

but won't be able to pour it until the spring."

The GF&P began its preparations for the project several years ago.

"For the last three years, we've visited the lake a couple times a year to take any game fish," said Todd St. Sauver, the regional fisheries manager for the GF&P. "It's never had a great game fish population. It's had a few bass, wall-eye, crappie and bluegill. The greatest percentage of fish in there are rough fish like bullheads, suckers and carp."

The draining of the lake is expected to take less than two weeks. It will result in the rough fish perishing.

In 2014, the lake will be restocked with game fish that St. Sauver hopes will keep the rough fish population at bay.

Since the dam at Beaver Lake was built in the 1930s, sedimentation has occurred at a rapid pace.

The body of water is fed by the large Beaver Creek watershed to the northwest of the lake, St. Sauver explained. Water from the lake eventually drains into the James River.

He said the watershed contributes to

approximately two inches of sedimentation on the lake bottom each year.

"Since we had to drain the lake down anyway to replace the spillway, I thought it would be nice to attempt to improve the lake," St. Sauver said. "That's where the thought of totally draining the lake and leaving it dry for a while came about."

"This has been done in other parts of the country, and there have been some favorable results," he added. "Essentially, when you dry out the lake bottom, those sediments dry out, settle, compact and there is some oxidation that goes on to tie up the nutrients. When the lake refills, that stuff stays sealed up on the bottom. It should result in improved water quality and, hopefully, increased depth (of possibly two to six feet)."

"In addition, while the lake is dried out, there will be a lot of vegetation that grows up along the edges of it. When the lake refills, that provides instant fish habitat. When we restock fish, they are going to have an abundance of cover and food. That will help restore the fishery in a hurry," St. Sauver said.

No money is available to do dredging of the lake, he explained.

Although the method has worked elsewhere, St. Sauver said Mother Nature provides no guarantees.

"It's kind of an experiment," he said. "We're doing it based on reported experiences in other

Menno

for something, they don't say a lot."

The sewer needs have existed for years, Thr anum said. The city installed sewer cameras in 2006 that already detected major problems at the time, she said.

"We are looking to replace some sewer lines that are over 100 years old," she said. "Some (lines) are cracked with tree roots infiltrating, some are offset and some are collapsing."

Menno mayor Darrell Mehlhaf was out of town Wednesday and couldn't be reached for comment. However, Thr anum said she has talked to council members who see the election's wide margin as a strong show of support for the replacement work.

"They were relieved to know people are backing them and understanding the importance of the project," she said. "If you want to see the community thrive, instead of just existing, we need to continue to try and make this a better

town in which to live."

The sewer project will encompass the entire town and be undertaken in three phases, Thr anum said. No timetable has been set for the project.

City officials will meet with their bond counsel, the Meierhenry Sargent law firm of Sioux Falls, to decide how to proceed, she said. The City Council has the opportunity to discuss the project further during Monday night's election canvass.

The passage of the bond issue means the city has a commitment of funds and can draw the money as needed, Thr anum said. The city determined the \$2.55 million bond issue would cover project expenses.

However, the city won't necessarily spend the entire amount of the bond issue, Thr anum said. The project will be bid out, and the cost could come in less than expected.

"We just replaced our sewer when they re-did Highway 18," she said. "We had a bond for \$240,000 but used only \$191,500, so that helped by saving us almost \$50,000."

Tuesday's election called for a 30-year bond rather than a 40-year bond in order to save on interest

expenses, Thr anum said. The bond counsel has advised the interest rate generally runs in the 3 to 3.25 percent range.

City officials are looking at other ways to cut project expenses, Thr anum said.

"Our engineering study is seeing if we can line for the sewer rather than dig up and replace parts," she said. "It's a less expensive way of going about fixing them and not tearing up the streets."

City officials will take another look at the project's feasibility study, which is nearly two years old.

Current plans call for funding the project with property taxes, Thr anum said. While those taxes may increase, residents were guaranteed a utility rate hike if the bond failed and the city had pursued a surcharge to cover the sewer project.

"The minimum charge (for utilities) is \$48.50 for water, sewer and garbage. That figure includes a \$3.50 surcharge for new self-reading water meters that send the information to our office and bill the customers," she said. "If we would have had to add a \$35 surcharge for our sewer, that would have nearly doubled the charge."

states. The science seems sound, but I've also been around long enough to know that science in one part of the country doesn't necessarily transfer over to our part of the country."

The watershed is big enough that one large rain could fill the lake overnight and take some time to drain down again, St. Sauver said.

"If too many of those events happen during the period we're trying to have it dry, it could impact the results of increasing the depth of the lake," he stated. "It's just one of the many variables that may affect the overall result of this project."

For the most part, St. Sauver said local residents have been supportive of the effort.

"There have been concerns about the odors that might be created when the fish die," he stated. "Some are concerned about losing the fish. There are some impacts for upstream landowners as far as a water supply for their cattle. We hope that everyone can endure this process. Hopefully, the end result is a better lake for the people in the area to enjoy."

If so, the project may be repeated in other parts of the state, according to St. Sauver.

"If we see some positive results out of this, it could become a tool to manage our small reservoir fisheries," he said.
