professional.

A house fire was reported at 3:14 p.m. Friday along Summer Street west of Yankton. The homeowners were not present at the time. Neighbors reported the blaze and were able to douse the exterior flames with a garden hose, according to Yankton Deputy Fire Chief Larry Nickles. However, fire on the interior of the house gutted out a large portion of the home before firefighters could beat it down. Nickles said the home is a total loss. The fire appeared to start on an exterior deck, but Nickles said a cause has not been determined. In addition to the fire department, Yankton County EMS and the Yankton County Emergency Management Office were on the

## **Flood Insurance Filing Date Moved To January 27**

PIERRE — Missouri River residents who have flood insurance have an additional 60 days to file claims and statements of loss for the 2011 flooding, officials with the National Flood Insurance Program have announced.

Owners whose buildings or property were initially damaged by Missouri River flooding on June 1 now have until Jan. 27, 2012, to file their claims and their proofs of loss (a statement of what was damaged by the flood). Those who first had damage on June 2 now have until Jan. 28, 2012, and so forth.

Flood insurance claims and proofs of loss usually must be filed with insurance agents within 60 days of the damage. That deadline has been extended several times for the 2011 Missouri River flooding.

• Make sure the fireplace has

from flying into the room. Ashes

them in a metal container. Keep the container a safe distance

• Test smoke alarms monthly.

In an effort to reduce winter

fires, NFPA is partnering with the

U.S. Fire Administration on a spe-

cial campaign — Put a Freeze on

Winter Fires. For more informa-

tion, visit NFPA's website at

# **Colder Temperatures Draw Warning On Fire Hazards**

'Tis the season for rosy cheeks, button-down coats, and cranking up the heat. According to the National Fire Protection Association (NFPA), it's also the time of year when home fires peak, many of which are caused by heating equipment. Beef and pork futures also traded

"Half of all home heating fires occur during December, January, and February, when we are fully utilizing our heating systems" said Lorraine Carli, vice president of communications for NFPA. "The public can reduce their risk of getting left out in the cold by following NFPA's safe heating behaviors.

In NFPA's report "Home Fires Involving Heating Equipment," in 2009, heating equipment was involved in an estimated 58,900 reported home structure fires, 480 civilian deaths, 1,520 civilian injuries, and \$1.1 billion in direct property damage. Stationary and portable space heaters accounted for one-third (32 percent) of reported home heating fires, but nearly 80 percent of the home heating fire deaths, twothirds (66 percent) of associated civilian injuries, and half (52 percent) of associated direct property damage.

Overall, fires, injuries and damages from fires involving heating equipment were all lower than in 2008 and fit into a largely level trend over the past few

The number of deaths from heating equipment was virtually unchanged.

As temperatures begin to drop, here are some safe heating behaviors to follow:

• All heaters need space. Keep anything that can burn at least three feet away from heating equipment, like the furnace, fireplace, wood stove, or portable space heater.

• Have a three-foot "kid-free zone" around open fires and space heaters.

• Never use your oven to heat your home.

• Have a qualified professional install stationary space Holiday Remembrance Program

All are welcome to join us on this special evening in memory of those who have died.
