Yankton Man Elected JRWDD Board Chairman

HURON — A Yankton man has been elected chairman of the James River Water Development District board. Jim Lane was elected to the chairman's post during the board's recent annual meeting in Pierre. Also, Randy Stanley of Groton was re-elected vice chairman and Randy Grismer was re-elected secretary. Gary Boomsma of Wolsey was re-appointed as treasurer for the district.

Crest Road At Gavins Point Closed Tuesday

The road that crosses Gavins Point Dam, also known as Crest Road or the spillway, will be closed from 8 a.m. until 5 p.m. on Tuesday, Jan. 17, to conduct maintenance at the powerplant. Motorists should seek alternate routes.

Interagency Lunch Slated For Friday

The Yankton Volunteer Leaders will hold their next Interagency Lunch at noon on Friday, Jan. 20, at the NFAA Headquarters 800 Archery Lane, Yankton. This month's guest speaker is M.J. Rogers, Archery Coach NFAA. He will share information regarding the National Field Archery Association in Yankton and lead a tour of the NFAA facility. Anyone interested in attending should RSVP to volunserve@iwi.net by Wednesday, Jan. 18, if you plan on eating lunch, which will be catered with soup, sandwich, and dessert. Water and coffee will be provided. There is a cost for the lunch.

Coalition For A Drug-Free Yankton To Meet

The Coalition for a Drug Free Yankton's monthly meeting is at noon on Wednesday, Jan. 18, at Lewis & Clark Behavioral Health Services. Lunch is provided. Attendees are asked to bring your own drink.

Writing Class Offered At Vermillion Library

VERMILLION — The Vermillion Public Library, 18 Church St., in collaboration with USD's Writing Center is excited to now offer the community an opportunity to improve their writing skills and ESL conversation abilities. The Writing & ESL Conversation Clinic has experienced writing and ESL conversation consultants from USD's Writing Center to help people of all ages from the community. This service is free. The clinic will be available every Monday and Wednesday evening, starting Wednesday, Jan. 18, through Wednesday, April 25, running from 6:30-8:30 p.m. in the South Dakota Room at the library. Bring your writing project, business or personal communications and develop proofreading and editing skills. Stop down for some ESL conversation building techniques. Call 677-7060 or visit vpl.sdl.net for more information.

MARRIAGE LICENSES

Here is the record of Yankton County marriage licenses for December 2011: Scott Knuths, 47, and Joanna Buhs-mann, 47, both from Pocahontas, Iowa, were married on December 1, 2011. Jason Brewer, 29, and Alyssa Tirrel, 23, both from Omaha, Neb., were married on December 3, 2011. Calvin Thompson, 49, and Kerri Grate, 34, both from Yankton, were married on December 7, 2011. John Wieseler, 50, and Cathy Schramm, 49, both from Yankton, were married on December 9, 2011. Frank Kincaid, 65, and Roxann Ridg-

way, 50, both from Yankton, were married on December 10, 2011. Josh Mueller, 25, and Tiffany Trentz, 26, both from Yankton, were married on December 10, 2011. John Garza, 34, and Amanda Taylor, 31, both from Yankton, were married on December 12, 2011. Frank Dooley, 41, and Leslie Larson, 39, both from Yankton, were married on December 16, 2011. Martin Bishop, 27, and Kathryn Blakey, 23, both from Geddes, were married on December 30, 2011.

ON THIS DATE

75 YEARS AGO
Saturday, January 16, 1937
• Seven deaths in 48 hours were reported today from influenza on the Crow Creek, Lower Brule Indian reservation, about 50 miles southeast of Pierre. Missionaries said many Indians are ill and more deaths were expected. Missionaries said the epidemic was complicated by inadequate food and housing conditions.
• In New York (Jan. 16) Dr. Herman Goodman, dermatologist, suggests men use lipstick to aid in the prevention of cancer. "Statistical studies of cancer," said the physician, "show that women suffer much less from cancer of the lips, and of the mouth generally, than do men in this country. Whether the lip pomade is to be colored or colorless is not a medical problem."

50 YEARS AGO
Tuesday, January 16, 1962
• Money lost in the burglary at the Black Steer restaurant Sunday night is estimated at \$1,290.75, with considerable damage also being done to two cash registers. A small safe weighing around 400 pounds was taken by the intruders. Most of the money taken was in the safe, with only small change lost when the two cash registers were forced open.
• Karl W. Kabeiserman, son of the Leo C. Kabeisermans of Route 1, Yankton has been appointed assistant counsel to Lt. Gen. A. T. McNamara, director of the

newly created defense supply agency. DSA provides common supplies and common services to the armed forces.

25 YEARS AGO
Friday, January 16, 1987
• The proposed use of \$4.7 million to fund research projects for state development will not touch the state's existing unemployment trust fund, Gov. George Mickelson said Thursday. Mickelson elaborated on his proposals to fund economic development during an interview in Yankton.
• The South Dakota Women of Today are observing WOT Week through Jan. 18. Yankton's chapter has the largest number of state officers of any chapter in the state. Among those state officers celebrating the achievements of the organization this week were Luana Johnson, state program manager; Kim Kappel, state president; Karen Miller, presidential assistant; Kathleen Casillas, president of the local chapter; Pam Kappel, state secretary and Dauna Ogden, State STEP program manager.

Fishing

From Page 1

"While the flooding was certainly devastating in some realms, it can actually be beneficial as far as the health of a fish population," said Todd St. Sauver, the regional fisheries manager for the GF&P. "All those nutrients that are released into the water during the flooding phase sparks the food chain. The nutrients help the plankton grow, and increased plankton leads to better small fish survival, and it works its way up the food chain." Stukel said he was surprised by the coldwater fish that passed through multiple dams due to the high flows. "We were catching smelt all summer long and into the fall which had come from the Oahe Dam or above, meaning they passed through four dams," he stated. "They were living happily here between Yankton and Vermillion this summer. That's a coldwater fish that has no business being down here. "Those are an excellent forage fish for walleye and bass," Stukel continued. "The predators below the Gavins Point Dam should be

very fat and happy having a food source like that just drop into their lap. That's just one of several small fish that had a population explosion this summer." Multiple confirmed reports of Chinook salmon being caught above and below Gavins Point Dam were also unusual. The cold-water game fish is rarely found this far south, even though they are stocked in the Oahe Reservoir. In October, the Chinook salmon record in Nebraska was broken twice. The previous record had been set in 1985 by a catch from Lewis and Clark Lake. The new record is for a 28-inch Chinook salmon caught near Gavins Point by James Ludlow of Omaha. It weighed 7 pounds, 5 ounces. "Chinook salmon is about as big of a bonus fish as you can get here in the Missouri," Stukel said. Not all of the effects of flooding on the fish population have been positive, he added. "We noticed a major increase in the invasive Asian carp during the fall and summer," Stukel said. "They may have spawned and fed just as well in the flooded terrain as the native fish did. So it's possible that the things that were good for our native game fish were also good for these invasive species, and they may have got-

ten a stronger foothold." The effects of the 2011 flood on the fish population should be realized for some time to come, St. Sauver said. "I think we'll see the benefits of the flood for anywhere from two to five years," he stated. "It's not that things were bad when they were normal, because they were very good. But these events push things to a higher level for a while." St. Sauver added that he is concerned about the effect of the dry fall and lack of snow on this region's lakes. The warm winter has led to lakes that usually have two feet of ice on them by this time of year having considerably less than that, and some have nearly re-opened. "We lost quite a bit of water off our lakes through the fall and early winter," he said. "It's normal for a lake to lose up to three feet a year just from evaporation in a year, but that's usually replaced by the moisture we get through snowfall and spring rains. If this winter continues without any snow and we don't get a lot of rain in the spring, we'll be starting kind of low. We'll just have to deal with what Mother Nature gives us."

Synthetic

From Page 1

ple of hits out of a bag of it, and you'll get just that euphoric feeling. The next day, you could take a couple of hits out of the same bag, and you are gone, because it's not a uniform mixture," he said. "And that's the danger of this drug. Some drugs you take, you know they're going to get you up. Some drugs you take, you know they're going to get you down. With this substance, you don't know which way it's going to take you." Not only are the intended effects of the drug inconsistent, the severity and duration of the side effects vary as well, Ebel said. "I've seen people who have been admitted for this out at the Human Services Center," he said. "One person was admitted Dec. 9, and I saw them Jan. 5, and they still had not been able to come back from the use of this substance." Since the use of the drug is still somewhat new, medical professionals are still searching for ways to treat its side effects, Ebel said. "They are using some intervention by seeing anti-psychotic medications," he said. "But it's so early in the treatment of it, we're not quite sure yet what is an effective treatment." With synthetic marijuana posing such a serious health risk, Ebel is urging parents to keep a watchful eye on their children. "If they have any suspicion of the use of this substance — if they start to get whiffs of the aroma of incense in the kids' rooms or on their clothing, things of that nature — it's time to investigate," he said. "And you need to sit down with your kids and talk to them about the effects of this substance and how dangerous it is." While the psychological rami-

fications are devastating enough, use of synthetic marijuana also has legal implications. Despite being legal for sale and use as an incense, ingestion of the drug for intoxication purposes is a Class 1 misdemeanor under South Dakota law, according to Darren Moser, detective for the Yankton Police Department. "We haven't had a lot of arrests, but we're starting to see more cases involved with it," he said. Moser said that tests are needed to verify the ingestion of the drug, but arrests are generally made based on behavior and presence of the substance. "We've had some run-ins where we've located some of the packages," he said. "A lot of it is the presence of these kids and how they're acting. You know they're under the influence of something, because it screws them up pretty good." With more businesses selling the product in the area, Moser predicted an increase in use of the substance as a drug. "I'm sure we're going to start seeing more of it," he said. Many states have banned the sale of the substance, but South Dakota has yet to do so. South Dakota Attorney General Marty Jackley issued an advisory earlier this month emphasizing that the drug is unlawful to sell, distribute, possess or ingest for intoxication purposes under a law that became effective July 1 of last year. Jackley said he is continuing to work with other state agencies and the Legislature to

further address the ever-changing synthetic drug market. Federal legislation that would ban the sale of synthetic marijuana was approved by the U.S. House last month, but the measure stalled in the Senate. "Right now, everything is on hold at the federal level for it to be illegal," Ebel said. The Synthetic Drug Control Act, approved by the House Dec. 8, would ban more than 30 synthetic drugs, including synthetic marijuana, and would also give the Drug Enforcement Administration more authority to put temporary bans on potentially hazardous drugs as they are being investigated.

The Senate version of the bill is being delayed by an objection from Sen. Rand Paul of Kentucky. With the measure on hold, Ebel encourages South Dakotans to start voicing their concerns to their state senators and legislators. "This substance needs to be banned immediately," he said. "The horrific effects of the use of it and the results that we have seen just make it something that, if we don't get a handle on it sooner rather than later, it's going to become a real problem."
