

Real Faces. Real Voices. Real Women in Healthcare.

Jean DeGroot

RTR(M)(CT)(MR), MRI/CT Team Leader

Q: Why are you passionate about your job?

A: I love being a Radiologic Technologist. I enjoy the daily interactions I have with patients because if people are a little scared or unsure about what's involved with the CT scan or MRI they are about to have, it feels so good to put them at ease. It's so rewarding when patients compliment us by saying how comfortable we made them feel.

Q: What changes have you seen since you started?

A: I have been employed here at Yankton Medical Clinic for 21 years, so I have been able to see many changes in the Clinic: the new building construction, PACS (Picture Archiving and Communication System) replacing x-ray film with digital images on computers, the addition of MRI (Magnetic Resonance Imaging) and currently the implementation of EMR (Electronic Medical Records). I am looking forward to this new technology for our clinic; it will really help us run more efficiently.

Q: Why do you love working for Yankton Medical Clinic?

A: I love working for Yankton Medical Clinic because I have always had an interest in how the human body functions. My job here as an MRI/CT Technologist allows me to be part of a team that helps each patient receive quality, compassionate care. We are so fortunate to have such a great medical community in Yankton and I'm very proud to be a part of it.

YANKTON MEDICAL CLINIC®, P.C.
