

# Quality Counts...

## So Does Every Penny

That's why we strive to deliver everyday low prices on the top quality natural foods you feel good about buying.

- Local and organic produce
- Hormone-free meats & dairy
- Gluten-free products
- Vitamins and supplements

### Why Go Organic?

- Organic foods generally contain higher levels of vitamins, minerals and antioxidants.
- Organic produce is not grown with harmful pesticides, herbicides, fungicides or other potentially dangerous chemicals.
- Organic farming is better for the environment because it prevents soil erosion and keeps harmful chemicals out of our water supply.
- Organic produce just tastes better
