“I believe there are a few people trying to use the pub- lic for what is essentially an entirely different purpose,” he said. “I think the question we need to ask is what are the standards. Do they fly high, or do they have to play the game of which they have to have them, but believe the information they read on the internet.”

As an example, Gulley supports Common Core.

“I believe the Common Core standards are the right standards for our students,” he said. “And they will improve the students who are either thinking critically and rapidly and what they have to learn.”

Local Control

Gulley said supervisor- ists from Yankton said to the sup- ported impacted Common Core from the beginning and started teaching the standards two years ago.

“Yankton has been the harshest of the concern that Common Core taking complete control,” Gulley said. “The misconception in that it does not mean we have to have the same text material. To the contrary, it is going to make teachers better,” he said.

Others

State schools can be closed, students will have flexibility in the foundations of standardized materials. What the standards will do is to improve the way we teach. T垢 undoubtedly support Common Core.”

Menno’s Christensen fore- saw a decline in the common core, he said.

Dry Cleaning

Q. What is dry cleaning?

A. Dry cleaning is a process which uses solvents to clean your clothing without water. There are many different substances. The dry cleaning process used in this country makes use of organic compounds like carbon tetrachloride and tetrachloroethylene which is also called Perchloroethylene. These compounds are toxic but are much less toxic when used in a closed system than when used in an open system.

Pharmacy/Nutrition

Q. What medicines may I take if I have a cold or cough and am pregnant or nursing?

A. If you are pregnant or nursing, please consult your pharmacist for advice. Medications should only be used during pregnancy if the potential benefits outweigh the risks. In some cases it is not known whether these medications are safe when taken during pregnancy, but it is believed that they are safe. If you have any questions, please consult your pharmacist.

Chiropractic

Out with the old, in with the new or do we keep both?

Traditionally, chiropractic care has been about wellness care and not about the treatment of disease. Many people believe that chiropractic care is only an afterthought or a treatment for a disease. Chiropractors are trained in adjusting the spine and using the nervous system to help the body heal itself. Chiropractors focus on the spine and its role in maintaining the health of the body. When the spine is aligned properly, the body can heal itself. When the spine is misaligned, the body is unable to heal itself. Chiropractic care can help improve the body's ability to heal itself.
