What is Hospice?

Hospice is a special kind of care designed to provide support for people in the final phase of terminal illness. Hospice is a steadily growing concept of humane and compassionate care that can be implemented in a variety of settings such as patient homes, hospitals and long-term care facilities. Hospice care seeks to enable patients to carry on an alert, pain free life and to manage other symptoms, so that their last days may be spent with dignity and quality, at home or in a home-like setting.
