ON THIS DATE

75 YEARS AGO

**Thursday, July 16, 1936**  
Sunbonnets like those worn by the pioneer women of the west, and which were a feature of the recent Dakota Territory Diamond Jubilee here, may become a symbol for the republican women of America - and the women of Yankton and Dakota may have a part in establishing it. This possibility was indicated with receipt of a telegram yesterday by E. J. Dowling, director of the recent Jubilee, asking how many sunbonnets could be secured here for use in the notification ceremonies for Governor Alf M. Landon, of Kansas, republican presidential nominee, to be held next Thursday, July 23, at Topeka.  
A good sized audience turned out at the Garden Terrace theater last night to enjoy the performance of "The Romancers", Edmond Rostand's eighteenth century romantic comedy,

produced by students of the Yankton college summer school, under the direction of Herbert L. Curry.

50 YEARS AGO

**Sunday, July 16, 1961**  
No paper.

25 YEARS AGO

**Wednesday, July 16, 1986**  
More than 30 school districts in South Dakota are at an impasse in salary negotiations this summer, according to South Dakota Education Association President George Bauder.  
The Vermillion teenagers rallied for four runs in the bottom of the seventh inning to tie the ballgame with Yankton's VFW-Optimist teeners, and then went on to post a 6-4 victory in an extra-inning affair Tuesday.

DAILY RECORD

POUND COUNT

Several animals are available at the Yankton Animal Shelter. For more information call the Yankton Police Department's Animal Control Officer, from 8 a.m.-4 p.m. Monday-Friday at 661-9494, or 668-5210. A \$5 fee is required to adopt an animal. Animals can be viewed on the Humane Society Web site at www.heartlandhumanesociety.net.

ACCIDENTS

A three-vehicle accident was reported at 5:02 p.m. Thursday in the 2000 block of Douglas Ave. One motorist was cited for careless driving.  
A sheriff's office report was received at 12:07 p.m. Thursday that a 2008 Mercury Mariner driven by a Yankton man collided with a deer on Highway 52 near Oak Hills Road. Estimated value of the damage to the vehicle was \$3,850.

INCIDENTS

A report was received at 3:42 p.m. Thursday of a burglary in the 700 block of West 15th St. A window was broken out of a garage door and some medication was stolen.  
A report was received at 6:30 p.m. Thursday that a small dog had chased a boy and scratched his leg. The dog could not be located.  
A report was received at 11:24 a.m. Friday of employee theft at a business.  
A report was received at 12:32 p.m. Friday of a mail theft in the 600 block of Douglas.  
A report was received at 1:36 p.m. Friday of a theft in the 600 block of Goeden Drive.  
A report was received at 1:50 p.m. Friday of a vehicle theft from a business.  
A sheriff's office report was received at 3:26 p.m. Thursday that six smart phones were fraudulently ordered on a business's account.

DAILY RECORD POLICY

The Press & Dakotan publishes police and sheriff reports as a public service to its readers. It is important to remember that an arrest should not imply guilt and that every person is presumed innocent until proven otherwise. When juveniles are released from jail, it is into the care of a parent or guardian.

It is the policy of the Press & Dakotan to publish all names made available in the police and court reports. There are no exceptions.

ARRESTS

Douglas Smith, 60, Yankton, was arrested Thursday on a warrant for forgery.  
Michael Hirschert, 52, Yankton, was arrested for driving under the influence (fourth offense or more).  
Tanner Shields, 21, was arrested Thursday on a warrant for failure to appear for two counts of possession of marijuana, and on a warrant for failure to appear on condition of bond.  
Michael Collier, 62, Honey Creek, Iowa, was arrested Thursday for driving under the influence (second) and careless driving.

Heat

From Page 1

high heat will be the very high humidity that is expected.  
"The way we measure humidity is to measure the dew point in the air," he said. "When you get dew points into the 60s, it is uncomfortable for some people. When you get dew points into the 70s it is very uncomfortable. What we are looking at is dew points in the mid- to upper-70s throughout this heat wave."  
Liebl explained that the heat index, or how hot it feels in Yankton, will average above 100 for the duration of this weather event.

"We predict a high heat index of 105 in Yankton on Saturday and 110 Sunday through Wednesday," he explained. "We are looking at 5-6 days of very hot conditions. The other thing to know is, a lot of times when you get higher temperatures, it will significantly cool off at night, (but) the temperatures are still going to be staying in the 70s (at night) even at the coolest point of the night this week. It makes it hard for homes to cool off; which is really where the dangers come in for the elderly and those who don't have air-conditioning."  
The NWS has issued an excessive heat warning, which it issues

when a high heat event is occurring, is imminent or has a very high probability of occurring. The warning is used for conditions posing a threat to life or property.

Liebl said the NWS will issue only one or two excessive heat warnings during an average year. "To have one that is going to last for 5-6 days is very rare," he said. "This is one of the more prolonged heat waves I have seen here in the upper Midwest in quite some time."

In the United States, heat is the number one weather-related killer, so it is an advisory that officials hope is taken seriously.

The National Weather Service statistical data shows that heat causes more fatalities per year than floods, lightning, tornadoes and hurricanes combined. Based on the 10-year average from 2000 to 2009, excessive heat claimed an average of 162 lives a year.

"Extreme heat and overexposure to sun can cause a great deal of stress on the body — it can make your cardiovascular system work harder than normal, cause severe dehydration and raise your overall body temperature, which could lead to severe problems," Hiltunen said. "The most common heat-related problems we deal with at the Avera Sacred Heart Hospital Emergency Department are dehydration and severe sunburn."  
Hiltunen said, people often

forget to use sunscreen and then become involved in some activity, such as work, in which they forget about how exposed they are to the sun's ultraviolet rays.

It's not uncommon for people to think they are safe from the sun because it's a cloudy day. In reality, the ultraviolet rays penetrating the cloud cover are just as strong as they are on a clear day.

The National Weather Service also reminds people not to leave children or animals in vehicles — even if the windows are down — because cars become like ovens during excessive heat events.

The NWS website explains that the atmosphere and the winds of a car are relatively "transparent" to the sun's short-wave radiation and are warmed little. This short-wave energy, however, does heat objects it strikes. For example, a dark dashboard or seat can easily reach temperatures in the range of 180 to more than 200 degrees.

The severity of heat disorders tend to increase with age. Conditions that cause heat cramps in a 17-year-old may result in heat exhaustion in someone 40, and heat stroke in a person over 60.

Scherschligt said anyone who is in a home without air-conditioning should take extra precautions including the use of fans, and consider going to locations with air-conditioning.

If possible, go to the library,

The Center, or a store or other location with air conditioning for part of the day. Air-conditioning in homes and other buildings reduces danger from the heat.

Other safety tips to keep in mind include:

- Make sure your child's safety seat and safety belt buckles aren't hot before securing your child in a safety restraint system, especially when your car has been parked in the direct sun;
- Lock all car doors and trunks and keep keys out of children's reach, so they do not accidentally become trapped in the vehicles;
- Reduce, eliminate or rescheduled strenuous activities until the coolest time of the day. Children, seniors and anyone with health problems should stay in the coolest available place, not necessarily indoors.
- Wear lightweight, light-colored clothing to reflect heat and sunlight.

"The best defense against a heat stroke or any other heat-related illness is to use common sense," Hiltunen said. "Stay hydrated, wear sensible clothes, wear a hat, wear sunscreen; just be smart — if its 100 degrees out, it's probably not a good day to play sand volleyball or do heavy gardening or yard work. Limit yourself and the activities in which you participate during extreme conditions."

BOARD OF TRADE

CHICAGO (AP) — Grains futures traded mixed Friday on the Chicago Board of Trade.

Wheat for September delivery fell 12.25 cents to \$6.9475 a bushel; December corn added 6.5 cents to \$6.85 a bushel; December oats fell 4 cents to \$3.645 a bushel; while November soybeans rose 3 cents to \$13.87 a bushel.

Beef and pork futures traded mixed on the Chicago Mercantile Exchange.

August live cattle edged up 0.05 cent to \$1.1060 a pound; August feeder cattle fell 1.22 cent to \$1.3570 a pound; August lean hogs added 0.78 cent to 98.95 cents a pound; while August pork bellies were unchanged at \$1.065 a pound.

S. D. GAS PRICES

Following is the average price of a gallon of regular unleaded gasoline in various communities around the state as of late this week, according to a weekly survey conducted by the Mitchell, Aberdeen and Yankton newspapers, along with information from AAA and various websites.

Mitchell	\$3.627
Rapid City	\$3.618
Sioux Falls	\$3.659
Yankton	\$3.699
Gayville	\$3.699
S.D. average	\$3.680
National average	\$3.667
