### ON THIS DATE

**75 YEARS AGO**  
 Wednesday, June 19, 1935  
 • Senate begins inquiry of charges of "graft" in Department of Commerce. The lines were formed for an intense struggle today as Ewing Y. Mitchell, ousted assistant secretary of commerce, was called to the stand in a senate inquiry into his charges of "graft" in the commerce department and "treasury plundering" under the ship subsidy system.  
 • Convict mutiny in Kansas mine has sudden end. Three hundred rioting prisoners surrendered early today without bloodshed; smoke from their own fire subdued them; their demands were not met.

**50 YEARS AGO**  
 Sunday, June 19, 1960  
 • No paper.

**25 YEARS AGO**

### RTEC

From Page 1A  
 The workforce will come from an associate's degree," Von Wald said.  
 Among MTI students last year, 35 percent of the student body had some sort of college degree when they came to the institution. Of those, 17 percent had a bachelor's degree and 2 percent had a master's degree.  
 "Why would anybody who had a master's degree or a bachelor's degree come back and get an associate's degree?" Von Wald asked. "Because we teach them skills. It's the specific skills that are being required in our economy today. It's the only way the United States and South Dakota are going to keep competitive."  
 Workers better not shy away from math and science education, he added.  
 "If you don't like science and math, suck it up," Von Wald said. "Just get in there and do it, because that is what is required for you to get good jobs in the future."  
 During the manufacturing institute, which is in its third

year at RTEC, students learn about safety in the workplace, tour local manufacturing plants and work on projects for the community. One item built this year was a raffle machine for Beadle Elementary School.  
 "That's what we try to do here: Give these guys a ground floor look at manufacturing from prototyping to production to showing up to work on time," said Josh Svatos, general manager of RTEC. "Manufacturing is not the dark, dirty, dingy jobs that were stereotyped in years past. I think these guys can attest to that."  
 The manufacturing academy is supported by a coalition of manufacturing businesses, educational institutions and even the South Dakota National Guard.  
 First Dakota National Bank was recognized for its large donation to the program.  
 "The \$6,000 that we invested in the academy this year and in previous years is used to strengthen our community," said Marc Mooney of First Dakota. "We at the bank believe that this investment is an investment in Yankton's future. You guys are going to come back and be part of the manufacturing sector."  
 Marie Steckelberg of the

Yankton Rural Area Health Education Center oversaw the CNA Institute. She noted that South Dakota will need 11,000 additional health care workers by 2016.  
 "That's one of the primary reasons we are having this Certified Nursing Assistant Institute — so we can provide an opportunity for students to learn about being a CNA and other health care professions."  
 Students visited an emergency room, experienced telemedicine and were exposed to many other elements of health care.  
 "CNAs play a very critical role in the care of the resident," Steckelberg said. "Never forget that what you do is very important in the care for the elderly and sick. I thank you from the bottom of my heart for choosing this career. If you choose to pursue another career in health care, never forget what you learned as a CNA."  
 Among the supporters of the CNA Institute are the Yankton Rural Area Health Education Center, the South Dakota Healthcare Workforce Partnership Fund, Mount Marty College, Southeast Job Link and RTEC.
