

THE PRESS & DAKOTAN WEATHER CENTER

Yankton's Forecast

Monday 20 Partly cloudy, scattered thunderstorms
Wind: ESE, 5 to 15
High: 84°
Low: 61°

Tuesday 21 Mostly cloudy, rain showers
Wind: ESE, 15 to 25
High: 71°
Low: 59°

Wednesday 22 Partly cloudy, scattered showers
Wind: E, 20 to 30
High: 68°
Low: 56°

Thursday 23 Partly cloudy
Wind: NE, 0 to 10
High: 73°
Low: 58°

Friday 24 Partly cloudy, scattered thunderstorms
High: 78°
Low: 61°

Open House At Sir Charles Housing Set

An open house at Sir Charles Housing, LLC, located at 118 E. Third St., Yankton, will be held Wednesday, June 22. Tours will be available from 3-6 p.m. There will be a short presentation at 4:30 p.m. Sir Charles Housing, LLC, is operated by Lewis and Clark Behavioral Health Services, Inc., of Yankton.

USD Med School To Present Symposium

VERMILION — The Sanford School of Medicine of The University of South Dakota is hosting a symposium on "Ubiquitin, Protein Quality Control and Molecular Pathogenesis" at the Andrew E. Lee Memorial Medicine and Science Building, June 22-24. Due to the rapidly growing faculty research in the area of Protein Quality Control and Degradation (PQCD) at the Sanford School of Medicine of the University of South Dakota, this three-day conference will focus on the role of the ubiquitin-proteasome system (UPS) and autophagy in cardiovascular disease, neural degeneration and cancer biology. In addition, a series of general discussions and poster sessions will provide an opportunity for participants to network with researchers and experts working in the field. State-of-the-art lectures from world-renowned scientists and presentations by the Protein Quality Control Degradation faculty of the Sanford School of Medicine will be targeted to research scientists, senior medical students, and physicians. Invited speakers include Ivor J. Benjamin, M.D., of the University of Utah (Chaperone and PQCD); Mark Hochstasser, Ph.D., of Yale University (Ubiquitin and DUBS); Xiao-Jiang Li, M.D., Ph.D., of Emory University (UPS in Neurodegeneration); R. John Mayer, Ph.D. M.D., University of Nottingham, United Kingdom (UPS and PQCD); Peipei Ping, Ph.D., UCLA (Proteomics of Proteasomes); and Jeffrey Robbins, Ph.D., University of Cincinnati (Cardiac Proteopathology). For more information, contact Basic Biomedical Sciences at (605) 677-5254 or email: biomed@usd.edu or visit www.usd.edu/medical-school/biomedical-sciences/research-symposium.cfm for a complete schedule of events and a registration form.

'Eagle Eye Ride' Slated For Saturday

The fourth annual "Eagle Eye Ride" will be held Saturday, June 25, in Yankton. Registration begins at noon at the Walnut Bar in Yankton and four other stops. The poker run invites all bikes, cars and trucks. There is an entry fee for two payouts, along with 50-50 drawing, door prizes and auction for big ticket items and good fun entertainment. All proceeds donated locally in memory of Mary (Carda) Simek.

LOTTERIES

SATURDAY RESULTS
 DAKOTA CASH: 07-16-24-28-30
 HOT LOTTO: 04-08-12-25-29, Hot Ball: 6

 WILD CARD 2: 03-06-07-26-28, Wild Card: KS
 2 BY 2: Red Balls: 3-19, White Balls: 12-24

SUNDAY RESULTS
 2 BY 2: Red Balls: 5-9, White Balls: 13-15. Top Prize \$22,000.

ON THIS DATE

75 YEARS AGO
 Saturday, June 20, 1936
 • Out of 300 cars tested yesterday afternoon and evening by members of the state motor patrol, 15 percent of the brakes and thirty-three and one-third percent of the lights of Yankton and Yankton County are defective.
 • An exact replica of the old Territorial Capitol building is being made from material from the original structure by E.D. Karr, who has been instrumental in locating and securing the material.

50 YEARS AGO
 Tuesday, June 20, 1961
 • The Gavins Point National Fish Hatchery was officially dedicated Monday afternoon in a ceremony held on the hatchery grounds.
 • Spectators were thrilled by the opening scene of last night's performance of "Rifles to Rockets," during which the Centennial Queen was crowned.

25 YEARS AGO
 Friday, June 20, 1986
 • Bethany Luken, 1-year-old daughter of Mike and Linda Luken, Yankton, is home recovering from a successful liver transplant.
 • Don Kruml has been named president of Gurney Seed and Nursery Corp. Kruml previously ran the 119-year-old company from 1974-1984.

Levees

From Page 1
 "It's going through in one place that we know of and overtopped in numerous places and there is seepage everywhere," Sitherwood said. He said most people evacuated well in advance of the flooding. Those who stayed were told Saturday night that water was flowing into the area. A few people live in cabins that have been built up and decided to stay, Sitherwood said. "Everyone up here knows the routine," he said. Juli and Steve Crenshaw, who were among those Big Lake residents who were remaining and using kayaks to get around, spent Saturday night scrambling to fix leaks in levees around the lake community. After helping to shore up one levee they headed to another one. "But when we got there with sandbags, the levee was gone," said Juli Crenshaw, whose basement was beginning to take on water. "It was too late. So we left there and went to another levee and started working to save it." The Big Lake area, where water has been high for the past couple weeks, has experienced major flooding in three of the last five years. But Sitherwood said this year promises to be much worse following weeks of high flows and increasing releases from the main stem dams in Montana and the Dakotas. "I know they wouldn't admit it, but this is a manmade event," said Sitherwood, echoing a sentiment common in the area that the Army Corps of Engineers is mismanaging the Missouri River.

the Missouri River. The commissioner said his own home is at risk. "Thank you Corps of Engineers," he said. The corps has said unusually heavy rains, not mismanagement, are to blame. "What we are dealing with is a massive weather system that put a lot of precipitation in the system," U.S. Army Corps of Engineers spokesman Kevin Wingert. "The end result is that water has to go somewhere." In neighboring Atchison County, there was a nearly steady flow of water over a half-mile stretch of a levee near U.S. 136 and overtopping at various points to the north that area, said Mark Manchester, deputy director of emergency management for the county. He said the water was flooding several thousand acres of farmland, but so far no homes had been inundated since a breach this past Monday caused about a dozen homes to take on water. Because of the high waters, U.S. 136 was closing near the Missouri-Nebraska border. Manchester said the river level has reached 44.6 feet, the highest on record and about 4 to 5 inches higher than 1993 flooding levels. He said minor flooding starts at 33 feet and major flooding at 43 feet. He said residents in the area had already evacuated their homes, and officials who operate the levee went up in a helicopter and saw several "pretty good size holes starting to form." The officials are predicating another breach, which could displace up to 200 more people. "That would be worse-case scenario," he said. "The information we are getting from the corps is that it's possible."

'Art In Bloom' Participants Sought

Yankton Area Arts and the Yankton Town and Country Garden Club invite the public to participate in the "Art in Bloom" event that will take place Aug. 3-6 at the G.A.R. Hall Art Gallery. This event will highlight the talents of local floral designers and garden enthusiasts who are challenged to create arrangements inspired by the photography featured during the annual Mighty Mo Photo Show. Designers wanting to participate are invited to the G.A.R. Hall Art Gallery July 22-28 to view the art on display. Designers then select a piece of art and creatively interpret their choice of work in their arrangement. Yankton Area Arts will host an Artist Reception at 5-7 p.m. Friday, Aug. 5. This event will be partnered with the regular First Friday event and it will be open to the public. For creative inspiration, visit the Milwaukee Art Museum or Minneapolis Institute of Arts websites under Art in Bloom. For additional information and entry deadline, phone Yankton Area Arts at 605-665-9754 or via web Wanda Veltkamp at wavaert50@msn.com, subject: Art in Bloom.

Rescue

From Page 1
 When an animal is brought in, Strenger said she does what is needed to care for the animals and get them ready for adoption. "When a puppy or kitten comes in, we deworm them and vaccinate them and everything," she said. She will also bottle feed any orphaned animals that require it. "One day I did five baby raccoons, two baby squirrels and six baby kittens," she said. "And that's around-the-clock work." Strenger said the amount of animals, as well as the work and supplies needed to care for them, has taken its toll financially. "We're always in need of food and litter and money for medical care," she said. While there are many other rescue organizations of the same name, Homeward Bound Pet Rescue is private, locally owned and unaffiliated with any government organization or national chain.

"We don't receive any city funds or anything like that," she said. "It's all based on the generosity of the people willing to help us out." Strenger added that the non-profit designation should open some doors for more funding in the near future. "I plan on applying for some grants to see if we can get some corporations or someone to help us with the food and veterinary care," she said. "But I have to wait for the final paperwork to do that." Until then, the business will need to rely solely on those willing to donate what they can. Since she can't afford to advertise, Strenger hopes to let others know about her efforts through word of mouth. "We're trying to get the word out that we do what we say we're going to do," she said. "It's not a bunch of talk and fundraisers. We actually do the work, and we're hoping that people can help us out." For more information or to contribute to Homeward Bound Pet Rescue, call (605) 665-2626.

Hatchery

From Page 1
 turbidity in our incoming water," he said. "We're keeping a close eye on that and making sure it doesn't plug or anything. And that would be a concern if that were to plug up. We would definitely lose flow." If that happens, the hatchery would need to look into an alternative water supply. "We have two water sources — lake water and well water," he said. "We would have to go to a backup water supply with the well water, which is much cooler right now. So that would have a little bit of an impact on us." Cooler waters can slow down the spawning process, something the hatchery encountered two weeks ago when the dam releases lowered water temperatures. "Our paddlefish spawning was delayed because of lower water temperatures than normal," Jackson said. "So it just took us a little longer to complete the spawning — a couple of extra days." Even with the minor setback and potential problems, Jackson said nothing has affected the hatchery's plans for its spawn releases this year. "As far as releases go, everything is on schedule," he said.
