# **Yankton Fourth Grade Classes** to Celebrate National Ag Week

American agriculture provides the necessities of everyday life: food, fiber, clothing and now fuel. That's the message that farmers will share with Yankton students to celebrate National Ag Week, which is March 24-28.

Dairy farmer Vicki Schultz, Freeman, will join pork producer Jim Petrik, Gayville, in visits with fourth graders at Webster Elementary. The dairy and hog farmer hope to educate students on how they care for their livestock and help them understand how South Dakota's number one industry affects nutrition and food supply, as well as agriculture's economic, social and environmental significance to all Americans.

The schedule for the classroom visits is as follows: Webster Elementary; Thursday, March 27, 2 p.m.

'The impact on South Dakota's economy alone from agriculture is over \$20 billion," Steve Rommereim, Ag United President and Alcester farmer, said. "And on a national scale, agriculture is America's number one export. But it's still easy to take agriculture for granted. We want to instill an appreciation for agriculture in our

local youth, advance an awareness of South Dakota's contribution and promote agricultural literacy."

Ag United will do more than talk; they're providing a pizza party too. During the visit, producers will help the students understand that the ingredients in the pizza are produced by farms, and also explain how those products are then processed and made into the pizzas that the students are enjoying.

In addition to the visit in Yankton, Ag United, along with its coalition members, Associated Milk Producers, Valley Queen Cheese and Land O'Lakes will sponsor Ag Day pizza party events for fourth and fifth graders at schools in Milbank, Sioux Falls, Watertown, Brandon, Mitchell and Harrisburg.

'Ag Day provides a great opportunity for South Dakota agricultural producers to share the story of where food comes from," added Rommereim. "And for many of these students, this is their first opportunity to learn about agriculture from actual producers."
