NOTICE OF APPLICATION

NO. 7980-3 to Appropriate Water

Notice is given that Francis Heine, 412 Sterling, Vermillion SD 57069 has filed an application for a water permit to irrigate 5 new acres. Water Permit No. 7578-3 appropriates 2.0 cubic feet of water per second from one well to be completed into the Missouri:Elk Point Aquifer (100 feet deep) located in the NE 1/4 SW 1/4 Section 21 for irrigation of 80 acres located in the S 1/2 NW 1/4, N 1/2 SW 1/4 Section 21; all in T92N-R51W. This application is to irrigate 5 new acres located in the SE 1/4 SW 1/4 Section 21-T92N-R51W from the well authorized by Water Permit No. 7578-3. This application, if approved, does not authorize any increase in the diversion rate.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 7980-3 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the Chief Engineer will act on this application, as recommended, unless a petition is filed opposing the application or the applicant files a petition contesting the Chief Engineer's recom-

2010 Legal and Public Notices

mendation. If a petition opposing the application or contesting the recommendation is filed, then a hearing will be scheduled and the Water Management Board will consider this application. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting this application or recommendation must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendation. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by May 19, 2014.

The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to this application. Steven M. Pirner, Secretary, Department of Environment and Natural Resources.

Published once at the total approximate cost of \$28.47.

Invitation To Bid

Sealed bids will be received by the State Engineer on behalf of the Bureau of Administration at the Office of the State Engineer, Joe Foss Building, 523 East Capitol, Pierre, SD 57501-3182 until May 28, 2014, 2:00 PM CT for labor and materials to Replace Asphalt, Mike Durfee State Prison, Springfield, SD, OSE# C1514-03X/SWMR.

Combined Bids will be received for civil work for the replacement of various parking lots. Some mechanical and sewer replacement is included as well.

Contractors Please Note: There will be a mandatory on-site pre-bid meeting at 10:30 AM CT, May 21, 2014. Each contractor shall examine the premises and be satisfied as to the existing site conditions before submitting a Sealed Bid. Bidders must have at least one member of their construction team present in order for their bid to be considered responsible. Subcontractors may attend for prime contractors in order to satisfy this requirement. Attendees must submit a DOC access approval form in the Project Manual at least 5 days in advance and fax to Les Marek 605.369.2813. Contractors are to meet at the main entrance.

Copies of the Plans and Specifications may be obtained by bidders at the office of SPN & Associates, 2100 N. Sanborn Blvd., Mitchell, SD 57301, 605.996.7761. Copies are on file for viewing purposes at the Office of the State Engineer, Joe Foss Building, 523 East Capitol Avenue, Pierre, South Dakota 57501-3182. Anyone requesting, reviewing, or copying Plans and Specifications for this project (such individual is hereinafter referred to as "bidder") agrees that they are doing so for the sole purpose of submitting a bid on the project. In consideration of the State of South Dakota providing such Plans and Specifications for the purpose of preparing a bid, bidder further agrees:

- A. The Plans and Specifications are the sole property of the State;
- B. Any copies of the Plans and Specifications obtained directly from the State will be returned to the office of SPN & Associates immediately after the State provides notice that bidder will not be awarded a contract, or thirty (30) days after the bid opening for the project, whichever occurs first;
- C. Any copies of the Plans and Specifications made by the bidder will be destroyed immediately after the State provides notice that bidder will not be awarded a contract, or thirty (30) days after the bid opening for the project, whichever occurs first;
- D. If bidder does not submit a bid, bidder will fulfill the requirements of B and C above on or before the date of the bid opening;
- E. The Plans and Specifications are to be used only with respect to this project and are not to be used for any other project or purposes other than preparing a bid for this project;
- F. The Plans and Specifications will not be disseminated to any person or entity for purposes other than obtaining pricing information without the express written approval of the state;
- G. All information contained in the Plans and Specifications is confidential; and
- H. Should the bidder disseminate the Plans and Specifications to an individual or entity for purposes of obtaining pricing information, the bidder will require that individual or entity to adhere to the

2010 Legal and Public Notices

terms set forth herein. The bidder, however, assumes no liability for the misuse of the Plans and Specifications by such third party or such third party's failure to comply with the provisions contained herein.

Should bidder be awarded a contract for construction of the project, bidder does not need to return or destroy Plans and Specifications until after completion of the project.

Each bid in excess of \$50,000.00 must be accompanied by a certified check, cashier's check or draft in the amount of 5% of the base bid and all add alternates and drawn on a State or National Bank or a 10% bid bond issued by a surety authorized to do business in the State of South Dakota and made payable to the Bureau of Administration of the State of South Dakota.

The Bureau of Administration reserves the right to reject any or all bids and to waive any irregularities therein.

process for a permanent CEO remain to be worked out, Ekeren said. However, the effort will be a partnership between Avera Health at the corporate level and the ASHH board at the local level, he said.

"There will be a conversation between Avera Health officials — specifically, (chief operating officer) Fred Slunicka — and our own board," he said. "They are working on that process. They haven't made a final decision on that. It may be later this summer when they determine that process." Ekeren referred further questions on the search process to ASHH board chairman Rob Stephenson. Neither Slunicka nor Stephenson could be reached Thursday for comment.

Ekeren does know one CEO candidate in the field — himself.

He confirmed Thursday that he would apply for the permanent ASHH position. However, he emphasized his current focus will remain on a successful transition and interim leadership.

"They wanted to ensure the transition was in place for when Pam completes her career at the end of June," he said.

Ekeren said he has enjoyed a strong working relationship with Rezac, both at ASHH and in his previous position with Pioneer Memorial Hospital & Health Services in Viborg. The current ASHH transition planning continues that teamwork.

Runoff

From Page 1A

reservoir system is still currently below the base of the annual flood control pool at 54.6 million acre-feet. With the forecasted runoff, the reservoir system will rise into the annual flood control zone this year, and then the stored water will be used during the remainder of the year to provide downstream flow support to things like navigation and water supply."

She added that the Corps does not anticipate evacuating water above the rate needed for downstream uses this year.

"However, if a significant precipitation event would occur in the upper basin, any flood water that is captured in the reservoirs will be evacuated through the remainder of the season at rates that are well within the channel," Farhat said.

The potential exists for minor to moderate flooding in the lower Missouri River and its tributaries due to normal thunderstorm activity. In that case, the Corps could utilize available flood control space in the reservoirs to limit downstream river levels.

"Typical summer thunderstorms can cause local-

South Dakota

State Theatre Turning Attention To Auditorium

SIOUX FALLS (AP) — With the renovation of the lobby of the historic State Theatre essentially complete, construction crews will be turning their attention to the auditorium in the ongoing effort to bring cinema back to downtown Sioux Falls.

The circa-1926 vaudeville and silent movie house, shuttered since about 1990, is being restored to the Beaux-Arts look from its original era but will boast a high-definition, digital projection system surrounded by high-fidelity sound, said executive director Stephen Williamson.

Scaffolding has been set up in the auditorium as crews prepare to work on new electrical and sound system wiring and heating and air conditioning ducts.

Artists will embark on complete restoration of the detailed stenciling that adorns the walls and ornamentation around the towering organ pipe chambers. Much of the stenciling was either covered with gaudy gold paint or drilled out to attach aesthetically displeasing acoustic tile, but the artists will have original photos from which to work, he said.

Williams said most moviegoers who frequented The State only remember its Art Deco appearance.

"There are all these baby boomers who used to come here but they've never seen the stencils," Williamson said. "They've never seen the artwork."

Officials hope to open the main level to seat about 400 people by early next year. Work will then turn to the 350-seat balcony.

The State will screen first-run films during the summer and holiday seasons, when blockbusters are typically released, but focus on art house and independent films the rest of the year while hosting an occasional small-venue concert.

The city of Sioux Falls helped by setting aside about \$65,000 last year to buy the digital projection system.

Michelle Erpenbach, a city council member, said the small contribution out of a larger \$1.8 million surplus was a good public-private partnership to support a great project.

Erpenbach said she and her husband often walk from their house to the downtown Phillips Avenue strip to grab a bite to eat.

"Wouldn't it be great to walk downtown and go to a movie?" she asked. "That's the kind of community spirit, community atmosphere that we want in that part of town."

Rezac has left a legacy beyond major building and remodeling projects, Ekeren said. He pointed to the emphasis on quality care and achieving patient and staff satisfaction.

As hospital CEO, Rezac will help preside over one remaining major event — Monday's groundbreaking for the Avera Yankton Care Center Replacement Facility and Hospice. The ceremony will take place at the Majestic Bluffs site west of Yankton.

"We're building two more wings and a hospice. It's going to be in the \$11-12 million range, so it's a big project," Ekeren said. "That will be a challenging project, and we will have one terrific state-of-the-art, long-term care community. We won't take a back seat to anyone."

Rezac has laid a strong foundation for the hospital's future, Ekeren said.

"I think we are headed in a lot of different areas that are very positive for us and for the community," he said. "But it's also a challenging time for health care with the Affordable Care Act and the other pieces that are going to be there two, three or four years from now, or even after (this year's) elections."

That sense of constant flux means remaining flexible, he added.

"We like to be able to anticipate as much as we can. But some things are out of our hands when it comes to federal rule making or state issues such as Medicaid expansion," he said. "In our case, being part of Avera Health provides a tremendous benefit. It helps us deliver services not only for Yankton but also the region."

In that sense, ASHH has emerged as a regional medical resource, Ekeren said.

"We have a medical staff in Yankton that is certainly much larger than your typical community of 14,000 people," he said. "We draw (patients) from a 15-county area in South Dakota and Nebraska. Yankton is a regional medical destination, and we certainly appreciate the need to make sure we are meeting those expectations."

Rezac has strengthened ASHH's relationship with the University of South Dakota School of Medicine, Ekeren said. Yankton serves as one of three sites in South Dakota for clinical training and has become nationally recognized for its "Yankton model" of instruction, he said.

"Those students (who train at Yankton) have very good test results, and they tend to stay in South Dakota," he said.

With more than 1,200 employees, ASHH ranks as one of Yankton's largest employers, Ekeren said. Rezac's successor will face the challenge of recruiting and retaining health care workers, he said.

"You look at the age of our workforce, especially certain professions such as nursing, over the next 10, 15 and 20 years," he said.

"There are a significant number of retirements, and when you look, are there enough people in the pipeline?"

Rezac's successor has a tough act to follow, Ekeren said.

"Pam has been very active and very effective," he said. "She is leaving very big shoes to fill."

to help us have a more informed process to make better decisions. To date, we haven't made any particular changes to the operation plan because of climate change, but all of these studies are providing additional information that will be useful."

Dr. Dennis Todey, the South Dakota state climatologist, said his office has participated with the Corps on one such study that looked at mountain snow pack and what decisions may need to be made because of those levels.

"The two biggest things we are seeing (in relation to the Missouri River basin) are precipitation changes," he said. "In the eastern part of the basin over the last century, we have seen, especially recently, some very large increases in overall precipitation. That has led to increased flooding. The western part of the basin (is seeing) decreases in the frequency of flooding."

"The other big pattern change we have seen is, despite what we saw last winter, increasingly warm winters," he added. "That's been the biggest temperature change overall."
