

Production Simulation

SUBMITTED PHOTO

Yankton High School economics students placed first in the region and second in the state at the inaugural Junior Achievement Production Simulation Contest. Pictured with the class is Steve Knight (Shur-Co) and Shelly Eilers (First Dakota National Bank). Shelly and Steve worked as mentors to the students during their in-class production simulation. Both have worked with the class through Junior Achievement for a number of years. This year they took it upon themselves to revamp the curriculum to better reach students and create more excitement and interest in the production simulation. The students did a great job with the competition and put in to action the principles they learned dealing with supply and demand, marketing and production this semester in economics. For their effort, the class as a whole won \$750 donated in part by Walmart.

Tractor Visit

SUBMITTED PHOTO

Jae Koletzky from Koletzky Implement visited Beadle School Second Grade on Friday, May 2, 2014. Mr. Koletzky presented students with information about farming and the role that tractors play in our food supply. Students were curious about the cost of tractors and tires. Mr. Koletzky also told them about how tractors are fueled and new EPA standards to prevent black smoke. The class was thrilled to be able to get into the cab of the tractor and see the number of computers and that tractors can be programmed to drive themselves.

YMS Donation

SUBMITTED PHOTO

The Yankton Middle School student council recently coordinated a coin drive and raised \$1,453.68, which was donated to The Center's March for Meals campaign. The Center provides 43,000 meals a year and more than \$18,000 of meals are provided to those who cannot afford a hot home cooked meal. Officials at The Center express their deepest appreciation to the YMS council for its donation.

Thank You
I would like to thank everyone who sent cards, phone calls and best wishes for my 80th birthday. It was very much appreciated and made for a very special day.
Sincerely,
Gale Erickson

In Theory, Rolling Wheels Can Jump-Start Diesel

BY TOM AND RAY MAGLIOZZI
King Features Syndicate, Inc.

Dear Tom and Ray:
I have a diesel engine. If I turn off the car while it is moving, then engage fourth or fifth gear and pop the clutch, will the engine jump-start? — **Bobby**

TOM: Probably.
RAY: As long as you're moving fast enough.

TOM: Diesel engines don't use spark plugs. They use high compression in the cylinders to create enough heat in there to combust the air and diesel fuel.

RAY: So then all you need is fuel delivery — which you have when the key is in the run position — and something to get the engine turning.

TOM: That's what the jump-start is for. Normally, when you put the car in gear (which connects the engine to the wheels), it's because the engine is already turning, and you want to use it to turn the wheels.

RAY: A jump-start (or roll start, most accurately) turns that equation around. Your wheels are already turning, and you want to use them to turn the engine.

TOM: So it should work, Bobby. The exact speed and exact gear

combination will be different for different vehicles. I mean, if you have a big V-8 diesel engine with really high compression (which means it takes more force to make the engine turn), and you try to start it in too high a gear or at too low a speed, the engine could actually win that battle with the wheels and bring the wheels to a stop.

RAY: So, for instance, if you're rolling at 15 mph in a big, honkin' 6-liter diesel V-8, and you pop the clutch in fifth gear, the car may come to a halt, without starting the engine. So you would have to experiment with differ-

ent speeds and gears to figure out where the limits are.

TOM: When you do that, wear your seat belt, a crash helmet and a mouth guard.

RAY: So theoretically, yes, you certainly can roll-start a diesel engine using fourth or fifth gear. But keep in mind that we do have a recent invention that makes this completely unnecessary in most cases, Bobby. It's called the ignition key.

Stop the madness! You can stop driving like a knucklehead, and you'll help your car in the process.
