Nurse's Aide Course To Be Held In Nebraska

NORFOLK. Neb. — Another session of a three-credit-hour Basic Nurse Aide course will be offered by Northeast Community College in November at Heritage of Bel Air.

The class, with course number NURA 1110-07/10F, meets Tuesdays, Wednesdays, Thursdays, and Saturdays, Nov. 9-Dec. 4, at Bel Air at 1203 North 13th Street in Norfolk. The Tuesday, Wednesday, and Thursday classes meet from 5-10:10 p.m. while the Saturday class meets from 8 a.m.-1 p.m. Tina Raeside is the instructor of this class.

This course is designed to meet the Nebraska Health and Human Services System training requirements for nurse aide certification and employment in longterm care facilities. It combines classroom lecture and laboratory application for the development of basic skills needed to provide safe, effective, and caring services to the elderly or chronically-ill patient of any age in a long-term care facility.

Upon completion of this course, the student is eligible to take the state written and practical skills exam. After successfully passing this examination and completing the application procedure, the student's name will be placed on the basic nurse aide registry at the Nebraska Health and Human Services Regulation and Licensure, Credentialing Division

Class registration is by phone only. To register, call (402) 844-7265.

Micromanaging Hubby Is Pain In Tuchus

BY TOM AND RAY MAGLIOZZI

Dear Tom and Ray:

My husband always gets mad because I immediately crank the ignition of our 2005 Honda Element. He tells me that I should wait a few seconds and listen for the fuel pump to fill. Is this true, or he is just micromanaging my driving? - Annette **TOM:** He's just being his usual pain in the

tuchus, Annette.

RAY: When you turn the key to the "run" position, the fuel pump is energized, and it provides full pressure to the injectors within a second, I'd say.

TOM: I guess he thinks it's better to wait a few seconds and make absolutely certain that the injectors are all fully pressurized, so that when you turn the key to the crank position, the engine will fire up right away. **RAY:** Instantaneously.

TOM: Right. He thinks that's preferable. So instead of cranking for half a second, the engine cranks for only a quarter of a second, and you save a little bit of wear and tear on

CLICK & CLACK

your battery and starter.

RAY: But I disagree. I'm more concerned about the internal engine components than with the battery or starter. Let's say, just for the sake of argument, that you don't have enough fuel pressure, and the engine has to

crank a few more times before it actually catches. I think that's a good thing.

TOM: Well, it has a beneficial side effect. **RAY:** Right – allowing the engine to crank for a few seconds gives the oil pump time to circulate the oil while the engine is turning slowly, before it starts running at 1,000 rpm. So I think Annette's husband ought be on her case to start the car more quickly! Turn that key faster, Annette!

TOM: Actually, we're splitting hairs either way with this argument. The bottom line is: You turn the key, you start the car and you drive away. That's the way the car is engi-

neered to work, and it works fine that way. **RAY:** But for the record, he's not only micromanaging, he's micromanaging incorrectly, Annette. Which, by definition, makes him a pain in the tuchus.
