Game On: Video Games Turn 40

BY CHRISTOPHER BORRELLI © 2012, Chicago Tribune

CHICAGO — The video game is

Its exact birthday is arguable. Cultural historians likely would date its origins further back, roughly a decade or two; prototypes of arcade games flourished in university computer labs in the 1950s. But "Pong," the first viable mainstream video game, blipped and blooped into bowling alleys and bars in 1972, and the Magnavox Odyssey, the first home gaming console, arrived 40 autumns ago. So, let's agree, 40 years old.

It may be the last time we

Because chances are you find the video game a marginal presence in your life, at best a timekilling commuter distraction, somewhere on the cultural scale between Honey Boo Boo and "Ice Age" sequels. But you would be wrong. The video game at 40 is having a midlife identity crisis, albeit one that is redefining what the medium itself means. If you haven't touched a joystick in decades, you would be disoriented: Metaphorically speaking, Mario's Kart is a Passat now. Donkey Kong more of a tweedy Dr. Zaius. The video game at 40 is often thoughtful, aesthetically sophisticated, more diversified than ever and rigorously thought about. Lately, it's been wondering whether it's art or should even aspire to the label; often, the reply is, yes.

But it's complicated. The video game at 40 is also self-conscious and stuck in its ways, its direction uncertain. It loses its car keys a lot now. Financially, it's unstable. Creatively, it's not sure what anyone expects of it anymore. It can be flatulent, frustrating, juvenile, insular and needlessly abrasive — as technologically innovative as it is intellectually inert. But here's the thing: Those contradictions are OK, even welcome. Because, in the life span of any art, 40 is like 15, and while rock 'n' roll considers retirement, the movie wonders about senility and the book ponders the grave, the video game, four decades old and more ubiquitous than ever, is maturing.

16 18 Walker, Tex. Ranger

TUESDAY PRIMETIME/LATE NIGHT

Ripening. Even rebelling.

"You can't deny video games increasingly do what art does, said Julian Dibbel, a University of Chicago law student who once literally made his living buying and selling virtual items in online gaming worlds. "Video games shape identities now, they have ideas that carry weight in the world. There's a culture there. and games with larger meanings. In many ways they are a tighter fit with contemporary culture than more traditional arts. In fact, why even hold up novels or films as what games should aspire to when, if we think of art as central to the way we live, the interactive nature of games is more relevant? Why aren't other arts more like games?" Nobody said puberty was

Nobody said puberty was pretty.

The problem is, try getting anyone to settle on what maturity should look like here. Does a mature video game culture mean a culture that is grim, serious and ambitious? A culture that accepts itself as broad entertainment? Or a culture that, as with film, literature and theater, reflects multitudes?

"You can't expect the video game or video game culture to ever be entirely mature," Nolan Bushnell said when I asked what he thought of the medium he more or less created 40 years ago. In 1972, Bushnell and programmer Ted Dabney started Atari, then developed "Pong," which popularized video games in general a few years later when Sears sold a home version. "Considering all the threads that exist now in video game culture, I think it would be impossible for the video game to be entirely mature. Would you even want it to be?"

Of course not, though surely he had loftier aims for the video game than gobbling quarters? "There was theoretical stuff in-
