Laurel Woman Dies After ATV Collision

LAUREL, Neb. (AP) — Authorities say a 67-year-old woman has died after an ATV collision in northeast Nebraska. The Cedar County Sheriff's office says the accident happened in Laurel shortly before 3 p.m. Friday. The sheriff's office says 67-year-old Sharon Bose was driving an all-terrain vehicle that collided with an ATV driven by 68-year-old Herbert Bose. Sharon Bose's ATV rolled on top of her and caused life-threatening injuries. She was flown to Mercy Medical Center in Sioux City, Iowa, where she later died.

NAMI Group To Meet Tonight

The Yankton NAMI Connections support group will be meeting at the Sacred Heart Pavilion at 7 p.m. tonight (Monday). New guests are especially welcomed.

Library Trustees Meeting Wednesday

The Yankton Community Library Board of Trustees will meeting at 5:30 p.m. Wednesday, Nov. 12, at the library meeting room, 515 Walnut. For further information, call 668-5275.

Online Youth Garden Training Slated

BROOKINGS — SDSU Extension is offering its final webinar of the season for those working with educational teaching gardens. The program will feature garden-based education resources and mini-grant opportunities through SDSU Extension. School teachers, after-school and summer garden program leaders and helpers are all encouraged to participate in the Garden-based Education Webinars. The webinar is scheduled for Wednesday, Nov. 12, from 4-4:30 p.m. CST. To participate in the Webinar, visit www.iGrow.org/events and click the link within the event posting. Participants are encouraged to log in within 15 minutes of the specified time. SDSU Extension is also requesting feedback on future training requests. Contact Chris Zdorovtsov, SDSU Extension Community Development Field Specialist at 605-782-3290 or via email at Christina.Zdorovtsov@sdstate.edu with your suggestions.

Wreath-Making Class To Be Offered

The Yankton Community Library, 515 Walnut, will host a holiday grapevine wreath making class on Monday, Nov. 17, starting at 6 p.m. Masters Gardeners Betts Pulkrabek and Mary Klimzyh will be facilitating the class. A fee which will pay for all materials will be charged. You will leave with a holiday wreath ready to hang. All registrations and fees must be received by Wednesday, Nov. 13. For more information, call the library at 668-5276.

Gospel Quartet To Perform In Scotland

SCOTLAND — The Gospel Gold Quartet will be in concert at the Fellowship Baptist Church in Scotland at 7 p.m. Sunday, Nov. 16. The church is located two blocks west of the high school auditorium. The public is invited to come and enjoy an evening of good quartet style music and fellowship. A freewill offering will be taken. For more information, call 605-212-9011.

ON THIS DATE

75 YEARS AGO

Friday, November 10, 1939
• Jim Koranda, Bon Homme County man, had a thrilling experience one day last week when he brought a goose down with a stone.
• The degree team of the Yankton unit of Catholic Daughters of America conducted an initiation ceremony and exemplified the ritualistic work of the Order for a large group of candidates in St. Agnes Court, Vermillion.

50 YEARS AGO

Tuesday, November 10, 1964
• Conversation about how to go about extending Yankton Senior High School to fit the growing enrollment and curriculum requirements was continued at last night's regular School Board meeting.
• Grants by several South Dakota banks have been received recently by the South Dakota Foundation of Private Colleges, it is announced by Albert M. Nelson, Yankton, executive secretary.

25 YEARS AGO

Friday, November 10, 1989
• Tens of thousands of giddy East Germans streamed into West Berlin and other parts of West Germany today after a heady night of celebrating the opening of the Berlin Wall and western borders for the first time in 28 years.
• In addition to two fine football

History

From Page 1

Principal Paul Struck believes it's important to teach students history at a young age. "We have to teach history. We learn from history. Kids love history," Struck said. "You can tie history in with math, science, English, music and art. Kids learn a lot when you tie all the disciplines together." Struck said that the state 125th birthday was the perfect opportunity for students to learn about the story of South Dakota. "We wanted the kids to learn more than past years about our state and about

our history. We have a lot to be proud of," Struck said. "As South Dakotans, we are very resilient and we have gone through a lot." The school will also be tying in some Veterans Day themes in the event, such as their annual Wall of Honor where students display pictures of their family members who have served or are serving in them military on a wall. "We do this every year but this is the veterans day wall of honor," Struck said. "Since we are doing this on Nov. 10, we are going to try to tie this in with it, too. Veterans are an important part of South Dakota history." Struck said that each classroom will offer something different. "I am hoping that people will walk around to each

classroom and see what the students have learned," he said. "This is a very special day that the kids will remember this forever." Here is what the individual grades will be presenting today:
• First Grade — The first graders have been focusing on Native American heritage. Today, they will display their yarn dolls and discuss the prairie ecosystem.
• Second Grade — The second graders will be showing their South Dakota quilt that they built while they were learning the history of homesteading. The students will also be making candles, butte and displaying their spool dolls. The second grade classes have also been learning about Native American heritage and Native American entertainment.

They will demonstrate games they've learned such as corn cob darts, chance games and marbles.
• Third Grade — The third graders will unveil the ABC book of South Dakota they created.
• Fourth Grade — Lincoln's fourth graders will unveil a star quilt they helped build during a South Dakota homesteading unit. Each student will also be introducing a project they created.
• Fifth Grade — Fifth graders will be hosting a venison feast and will be introducing pioneer toys that each student has made.

Test

From Page 1

fort to remind people to check and change the batteries in their smoke alarms and carbon monoxide detectors during the spring and fall changes. All detectors have a button that will test the device's battery. But the testing shouldn't stop there. "Pushing the button is only testing the battery in your detector," Nickles said. "It is not actually testing if your detector is working." To test a detector, buy a small spray can of smoke detector test aerosol, which can be found at some hardware or home improvement stores. They cost only a few dollars, and one small can will last for years. Just spray some of the test material into the detector, and wait 5-10 seconds for a response. If the alarm sounds, the unit will sound in a fire. If not, you have a non-functioning smoke detector and should replace it as soon as possible. It's recommended that you should test your detectors

battery life at least once a month. "Smoke detectors should be replaced every 10 years while carbon dioxide detectors should be changed every five years," Nickles said.
IONIZATION VS. PHOTOELECTRIC
There are options when it comes to purchasing smoke detectors. Nickles said it is important to know the difference between them. "Though they are both good, some articles I have read (recommend) people not to buy ionization detectors anymore because photoelectric has a quicker response," Nickles said. "Detectors' timing can play a role in how severe fires are." For the best protection, it is recommended both ionization and photoelectric alarm technologies be used. A combination of both technologies in a single device are also available. • Ionization Smoke Alarms: According to the National Fire Protection Association, ionization smoke alarms are more responsive to flaming fires. Ionization smoke alarms have a small amount of radioactive material between two electrically charged plates which

ionizes the air and causes current to flow between the plates. When smoke enters the alarm, the ions bond with the smoke, breaking the path of electricity so when the electricity is reduced, the alarm goes off. "Ionization detectors are the alarms we give away at the station," Nickles said. • Photoelectric Smoke Alarm: Inside the ionization alarm there is an LED light that sends a beam of light across its chamber. In a separate part of its chamber there is a photo sensor that detects light. As smoke enters this detector, the smoke interrupts the light beam, scattering it in many directions. When the light beams hit the sensor, the alarm goes off. "In a smoldering fire, like a cigarette in a chair, the photoelectric is going to read it faster than ionization," Nickles said. "Photoelectric breaks the beam in the light while ionization reads the particles. So if there are no particles in the smoke, it's not going to read it as soon."

WHERE TO INSTALL DETECTORS

• According to the National Fire Protection Association, Smoke detectors should be installed inside each bedroom, outside each sleeping area, and on every level of the home including the basement. On levels without bedrooms, install alarms in living areas.
• Smoke alarms should be installed at least 10 feet from cooking appliances to minimize false alarms when cooking.
• Alarms should be mounted high on walls or ceilings because smoke rises. Wall mounted alarms should be installed not more than 12 inches away from the ceiling.
• Don't install smoke alarms near windows, doors or ducts.
• For best protection, interconnect the same brand of smoke alarms. This means when one alarm sounds, they all go off.
