

# Pursuing Perfection.

## FINDING HOPE.

We admit we're perfectionists. Our pursuit for perfection is never more important than in the fight against cancer. When healing is the only concern, perfection is using every tool, every advance in technology and every ounce of persistence. Perfection means more than upholding the standard we've set for ourselves, it's providing hope for a cure.

With our nationally recognized cancer program, four cancer centers and 41 outreach locations throughout the region, Avera is pursuing perfection to care for you – wherever you are.

As part of the Avera system of cancer care, Avera Sacred Heart Cancer Center provides the latest technology for all types of radiation oncology, including a newly-added breast brachytherapy machine – the latest in combatting breast cancer. Expert cancer care is truly wherever you are.

Mammography Technicians (left to right) Sara Barta, Carol Cook, Chanda Mueller, Kathy Schneider and Kelly Wieseler specialize in providing private, comfortable and personal imaging services.
