Vishay

From Page 1

they work mostly in teams, performing operations such as winding, soldering, inspecting and testing components.

Many of the products are also custom-ordered, so workers are often found scouring over instruction documents up to 25 pages long.

"I like the work. It's intriguing," said Nadine Renteria, a team leader for one of the medical component groups. "It makes you think about your work all the time and where the parts are going. We know that the parts we are working on are going to help somebody with their health, so you automatically take pride in what you do."

While some employees like Renteria assemble components with their hands and tools, others operate automated machinery.

Karen Schnoor, who works in the power inductor group, is responsible for making sure materials created by a press are within certain quality standards. She also alters settings to create different sizes of materials.

"It's challenging," Schnoor said. "It can also be frustrating — working with a variety of very little pieces."

Most production workers receive the majority of their training on the job, Butler said. With the amount of skills required for various types of work, this can take several months, he said.

"They learn how to interpret instructions and understand the importance of that job," he said. "They also learn how to participate in problem-solving groups, and will also do job relations training."

Despite not needing pre-requisite training, Vishay employees are expected to have certain attributes, Butler said. These include sufficient dexterity and eyesight, as much of the work is done with small parts under a microscope, he said.

"It's very high reliability, very miniature componentry work — some wire is as fine as your hair," he said.

Butler said that while many people might consider the production work mundane and repetitive, there is plenty of variety in the direct laborers' work. Employees in the medical component group, for example, will often rotate with other team members and perform different tasks, he said.

As for the machine operators, Schnoor said she finds plenty of challenges in the numerous presses she runs.

"They switch me around enough, I never get bored," she said with a laugh.

National Publication Ranks USD School Of Law 'Best Value'

VERMILLION — The University of South Dakota School of Law is one of the top law schools in the nation when it comes to value, according to The National Jurist, which ranks the USD School of Law No. 5 on its Top 20 list of "Best Value Law Schools."

In addition to bar passage, the magazine's rankings take into account in-state tuition, debt and the percent of graduates employed nine months after getting their degree. The top 20 list is featured in the October issue of the magazine and is dominated by public law schools, including the top five schools on the list. It's the sixth time since 2004 that The National Jurist, a magazine published for law students, has honored law schools for providing a good value.

"Being ranked as a 'best value' is further evi-

dence that our faculty and administration is committed to ensuring that our students are receiving an affordable and reputable legal education that will prepare them for a successful career after law school," said Thomas Geu, dean of the USD School of Law.

Criteria used to identify the "Best Value" law schools, according to the magazine, were based on a two-year average for both bar pass rate and percent of students employed, and it did not automatically exclude schools that did not meet the bar pass standard or a tuition or employment standard. A complete listing of "Best Value" law schools and additional information about the rankings can be found at www.nxtbook.com/nxtbooks/cypress/nationaljurist1013/#/22/.

Camp

From Page 1

Human Services Center (SDHSC). The camp is a collaborative effort between the Yankton Rural Area Health Education Center, Avera Sacred Heart Hospital, South Dakota Department of Education Office of Curriculum, Career and Technical Education and the South Dakota Department of Health Office of Rural Health.

Becky Jibben, simulation RN coordinator for SIM-SD, said their session is meant to give students experience with emergency medical attention.

"(SIM-SD) is a project funded by the Helmsley Trust," Jibben said. "We go across the state of South Dakota and we do education for emergency departments and EMS agencies."

One of the centerpieces of the group's training, displayed for campers, was a \$100,000 animatronic "patient" simulator named Adam. The seminar included an overview of what training to become a paramedic entails and demonstrations with the simulator.

Exhibitors were also present from University of South Dakota Health Sciences and Nursing programs, Augustana College, SDHSC, and the SDSU Pharmacy program, among others.

Hallberg said camps like this are necessary with the changing climate of the field of medicine.

"There's an incredible shortage of healthcare providers all over the country," he said. "That shortage is expected to continue. There's a large shortage of pharmacists in our state because they're getting older and, as they get ready to retire, it's tough to be out there and own your own pharmacy without doing something else at the same time."

He said that the camps are geared to evolve with what the industry is in need of most.

"We learn from the healthcare world around us some of the things we should be doing," he said. "If there's a particular profession that, for example, is predicted to need a 40 percent increase in practitioners over the next five or six years, we try and get an exhibitor or a presenter in that profession. Historically, there have been certain shortages in certain professions that were more critical than others, and if we see something that's growing, we like to have a session

like that so that changes from year to year."

In addition to learning about elements of the healthcare profession, some sessions also served to teach students how to lead healthier lifestyles. During the nutrition session, students were given the chance to make smoothies out of healthy ingredients.

"What we're trying to show with that session is the things that you can do that are good and good for you at the same time," Hallberg said.

This year's Yankton camp hosted 76 students. Hallberg said plans are to host the camp in Yankton around the same time next year. A Scrubs Camp is also slated to take place at the University of South Dakota next March.

For more information on upcoming Scrubs Camps, visit http://www.scrubscamps.sd.gov/.

DAILY RECORD

POUND COUNT
Several animals are available at the Yankton Animal Shelter. For more information call the Yankton Police Department's Animal Control Officer, from 8 a.m.-4 p.m. Monday-Friday at 661-9494, or 668-5210.

DAILY RECORD POLICY
The Press & Dakotan publishes police and sheriff reports as a public service to its readers. It is important to remember that an arrest should not imply guilt and that every person is presumed innocent until proven otherwise. When juveniles are released from jail, it is into the care of a parent or guardian.
It is the policy of the Press & Dakotan to publish all names made available in the police and court reports. There are no exceptions.

ARRESTS
• Jamie Peltier, 26, Flandreau, was arrested Monday on a warrant for failure to appear.
• Jerrad Andal, 37, Dell Rapids, was arrested Tuesday on a warrant for failure to appear.

ACCIDENTS
• A report was received at 12:38 p.m. Tuesday of an accident in the 900 block of Summit St.

INCIDENTS
• A report was received at 2:24 p.m. Wednesday of the theft of a piggy bank from a residence in the 600 block of West Sixth St.
• A report was received at 6:16 p.m. Wednesday of the theft of a silver 1987 Pontiac Fiero in the 300 block of East Fourth St.
• A noise complaint was received at 7:49 p.m. Monday on a man in the 1200 block of West 12th St. using a loader to move dirt. He said he would stop for the night.
• A report was received at 4:13 a.m. Tuesday of a 911 hangup in the 800 block of Burleigh St. A male was arrested for simple assault (domestic).
• A report was received at 10:31 a.m. Tuesday of the theft of bricks in the 100 block of East Sixth St.
• A report was received at 12:34 p.m. Tuesday of a shotgun laying in the backseat of a vehicle with its windows down in the 2200 block of Broadway. An officer advised the owner to secure the gun.
• A sheriff's office report was received at 8:46 p.m. Monday that a dog had bitten an individual along Wildflower Road, Yankton.
