Long-Term Care Education Sessions Start Soon

PIERRE — The South Dakota Department of Social Services is hosting several educational sessions in the coming months on long-term care and the Long-Term Care Partnership Program.

“Planning for long-term care needs before you need them is helpful for you and your family,” said Kim Malsam-Rysdon, Secretary of the South Dakota Department of Social Services. “I strongly encourage families to attend an educational session on the Long-Term Care Partnership Program to learn more about the options available for them. A long-term care insurance plan certified by the Long-Term Care Partnership Program benefits people needing long term care and their families, long term care providers and the state’s Medicaid program.”

The Long-Term Care Partnership Program

is a public-private partnership that offers individuals quality, affordable long-term care insurance without depleting their assets. The South Dakota Department of Social Services began offering free educational sessions on the program in 2007 to raise awareness about long-term care insurance and the benefits for South Dakotans.

The fall 2012 educational session schedule includes stops in several communities from September through November. Sessions will include basic information on long-term care, the costs related to it, how to plan for long-term care needs, what Medicare and Medicaid will cover and how the Long-Term Care Partnership Program can help. The educational sessions are free and open to the public. Each session is scheduled for one hour.

The regional schedule includes:

- Oct. 1 — Sioux Falls: IPC Community Ed, 201 E. 38th St., at 7 p.m. CDT. Session is open to the public, but registration is required. Contact (605) 367-7999
- Oct. 2 — Vermillion: Vermillion Public Library, 18 Church St., at 2 p.m. CDT
- Oct. 10 — Chamberlain: Public Library, 110 E. Lawler, at 3:00 p.m. CDT
- Oct. 12 — Sioux Falls: Caille Branch Public Library, 4100 Carnegie Cr., at 12:00 p.m. CDT
- Oct. 30 — Yankton: Yankton Public Library, 515 Walnut St., 1:30 p.m. CDT
- Nov. 1 — Sioux Falls: Active Generations, 2300 W 46th St., at 10:30 a.m. CDT Session is open to the public but registration through Active Generations is requested. Call (605) 336-6722
- Nov. 15 — Mitchell: Mitchell Public Library, 221 N. Duff St., at 1:30 p.m. CST

Voting

From Page 1

“There are always people who come to a voting place at five minutes to 7 p.m. on election night only to discover they are in the wrong precinct,” she continued. “They don’t have time to drive to the precinct they are registered in. That will no longer be an issue.”

Jones said the move could save the county money and make the

voting system more efficient. During the last primary election, she said the cost per voter was as low as \$10 in one Yankton location and as high as \$170 at a rural polling station. The overall average cost was \$46.32.

With the new system, it is projected that the average cost could be reduced to \$2.79.

Secretary of State Jason Gant, who was present at Wednesday’s meeting also described some of the changes at the meeting.

“With the new system, you are not voting online,” he said. “You still get your paper ballot and pencil to fill in the ovals and cast your vote.”

The new voting center concept has been implemented at three rural counties throughout the state, along with Sioux Falls. Gant said he is happy with the progress of the system and that it has been very successful so far.

“The beauty of the new technology is that we are now able to connect the whole county on one system,” he said. “This allows voters to cast their ballot anywhere in the county.”

He said that voters might be overwhelmed with seeing the new technology when they walk in to cast their vote, but the computers are only used to sign in voters. The rest of the system is done the same

way it has been in the past.

Gant added there have not been too many troubleshooting issues in other counties that have implemented the system already. He said the new system allows the check in process to be more efficient, faster and more secure.

“This system is a great step forward for the state,” he said. “We are on the cutting edge of this technology. Yankton County requested the new technology and I was happy to come help them get set up.”
