A recent study conducted the South Dakota (SD) teacher shortage at ele-
ments to determine the reasons why districts are having difficulties retaining and attracting qualified teachers due to low salaries and the teacher shortage this year. In South Dakota, the average teacher salary is $53,045. This is 17% lower than the national aver-
average, which is $64,673. This is why.

According to research done by the South Dakota Education Trends (SDET), South Dakota teachers and parents are concerned about the teacher shortage this year. The SDET study showed that South Dakota schools are facing a shortage in mathematics, science, and some other subjects. The SDET study indicated that South Dakota schools are having a difficult time filling positions, which can negatively affect student achievement.

The SDET study also found that South Dakota schools are facing a shortage in mathematics, science, and some other subjects. The SDET study indicated that South Dakota schools are having a difficult time filling positions, which can negatively affect student achievement. The SDET study concluded that South Dakota schools are facing a teacher shortage due to low salaries and the teacher shortage this year.

According to the SDET study, South Dakota schools are facing a teacher shortage due to low salaries and the teacher shortage this year.
