THOUGHTS
For Your Family
Directors Jim, Steve, Paul & Jerry Wintz
WINTZ & RAY
FUNERAL HOME and CREMATION SERVICE
A FINAL GOODBYE
As uncomfortable and as awkward as a visitor might feel when making a final visit to a dying loved one, the benefit derived from such heartfelt meetings quickly outweighs any uneasiness. Visitors should make it a point to sit at eye level, within touching reach, while taking their conversation cues from the dying person. Silence is fine, since the mere presence of a caring visitor is sometimes all that is needed. At the same time, visitors should not contradict the patient, who says that he or she is dying. Visitors should accept any emotion that may accompany the statement by empathizing and listening. Talking about unfinished business should be seen as opportunities to express love or say goodbye.
Nothing adequately prepares you for the initial shock of a loved one's death. Feelings of panic and helplessness may be overwhelming, but it's important to know you are not alone. For more information, please call WINTZ & RAY FUNERAL HOME at (605) 665-3644. You are invited to visit our facility at 2901 Douglas Ave. Please visit us at www.wintzrayfuneralhome.com. We have been serving our community with pride for many years.

DENR Accepting Applications For Water Quality Projects

PIERRE — The South Dakota Department of Environment and Natural Resources (DENR) is accepting applications through Oct. 1 for projects eligible for federal Clean Water Act, Section 319 nonpoint source control grants. DENR officials anticipate approximately \$2 million will be available for projects in South Dakota. The federal Environmental Protection Agency grants require 40 percent local match. Eligible applicants include governmental agencies; state government subdivisions, such as conservation districts, water development districts, counties and municipalities; universities; certain nonprofit organizations; and federally recognized Indian tribes. Other groups may participate by applying through one of the eligible entities as a project partner. Entities interested in applying for Section 319 grant funds by the Oct. 1 deadline are encouraged to contact DENR at (605) 773-4254 or obtain application guidance at http://denr.sd.gov/dfta/wp/319.aspx. Section 319 of the federal Clean Water Act provides grants to reduce water pollu-

tion from nonpoint sources, such as polluted runoff from urban, agricultural and forest lands. DENR historically has used the Section 319 funds primarily to develop and implement projects designed to reduce nonpoint source pollution to meet Total Maximum Daily Loads (TMDLs). South Dakota water bodies in need of TMDLs are listed in the "2014 Integrated Report for Surface Water Quality Assessment." A copy of the report is available from the DENR website at http://denr.sd.gov/documents/14ifinal.pdf. Nonpoint source pollution originates from many sources, including heavily fertilized lawns, urban runoff that carries street and pet wastes, agricultural fields, small livestock operations and natural sources, such as highly erosive soils. The primary nonpoint source pollutants in South Dakota are sediment, phosphorus, nitrogen and fecal coliform bacteria.
